Universiti Sultan Zainal Abidin (UniSZA)

2011

# Kandungan...

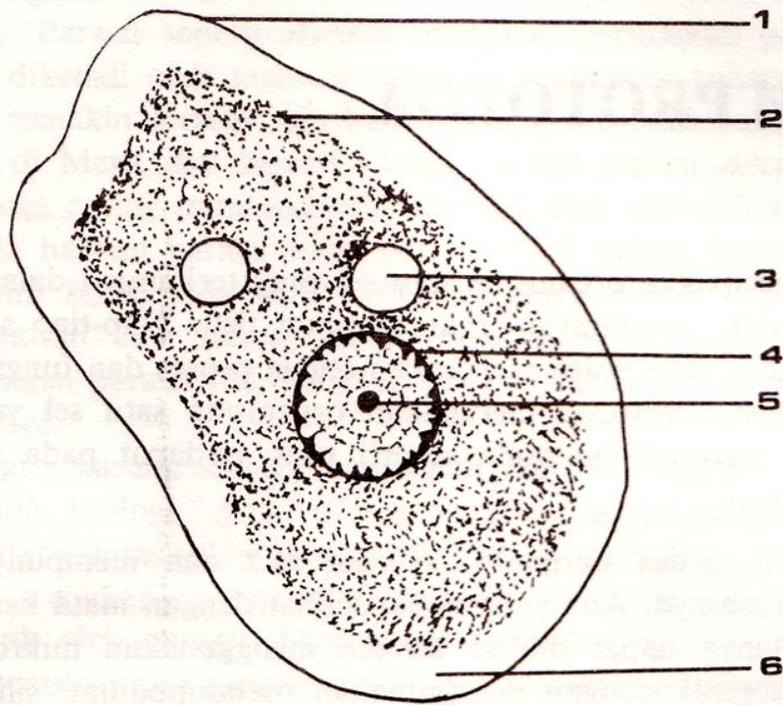

## **ATLAS PARASITOLOGI PERUBATAN**

• Rajah 1 – Entamoeba histolytica .....	2
• Rajah 5 – Kitaran hidup Entamoeba coli .....	3
• Rajah 6 – Parasit-parasit Amoeba manusia .....	4
• Rajah 8 – Struktur Trichomonas .....	5
• Rajah 9 – Flagelat usus .....	6
• Rajah 10 – Bentuk Tripanosom didalam darah .....	7
• Rajah 18 – Morfologi Balantidium coli .....	8
• Rajah 20 – Rajah skema Trematod .....	9
• Rajah 22 – Morfologi Clonorchis sinensis .....	10
• Rajah 24 – Morfologi Heterophyes & Metagonimus yokogawai .....	11
• Rajah 27 – Morfologi Fasciolopsis buski .....	12
• Rajah 29 – Morfologi Paragonimus westermani .....	13
• Rajah 31 – Morfologi Schistosoma sp. ....	14
• Rajah 38 – Morfologi skoleks & proglotid gravid Taenia sp. ....	15
• Rajah 40 – Morfologi Echinococcus granulosus .....	16
• Rajah 44 – Morfologi cacing Nematoda .....	17
• Rajah 46 – Kitar hidup Trichuris trichuria .....	18
• Rajah 47 – Kitaran hidup Strongyloides stercoralis .....	19
• Rajah 49 – Anatomi rongga mulut cacing kerawit Nematoda .....	20
• Rajah 50 – Kitaran hidup Enterobius vermicularis .....	21
• Rajah 52 – Morfologi 7 spesies mikrofilaria manusia .....	22
• Rajah - Struktur ultra Trichomonas .....	23
• Rajah - Trofozoit Toxoplasma gondii dalam makrofaj .....	24
• Rajah - Rajah skema struktur ultra Toxoplasma gondii .....	24
• Rajah - Rajah Naegleria fowleri .....	25
• Rajah - Objek Artifak .....	26
• Rajah - Rajah skema Trematod .....	27
• Rajah - Rajah Fasciola gigantica dewasa .....	28
• Rajah - Rajah telur Fasciola .....	28
• Rajah - Ciri – ciri pembeza cacing pita manusia .....	29
• Rajah - Sestoda manusia .....	30
• Rajah - Morfologi cacing nematoda .....	30
• Rajah - Nematoda : Sistem pembiakan cacing jantan .....	31
• Rajah - Nematoda : Sistem pembiakan cacing betina .....	32
• Rajah 57 – Morfologi & anatomi beberapa cacing nematod .....	33
• Rajah 58 – Rajah Enterobius vermicularis .....	34
• Rajah 68 – Telur cacing helmin .....	36
• Rajah 69 – Siput-siput yang menjadi perumah perantara fluk manusia .....	37
• Rajah - Beberapa spesies Amoeba (jadual) .....	38

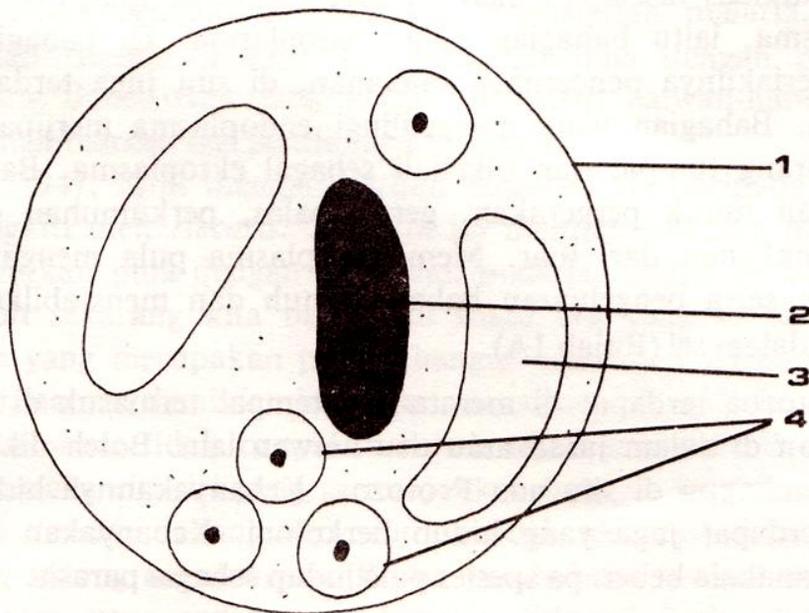

## **ENTOMOLOGI PERUBATAN**

• Rajah 1.1 – Anatomi Nyamuk betina dewasa .....	40
• Rajah 1.4 – Komponen hadapan mulut nyamuk dewasa .....	41
• Rajah 1.9 – Pandangan dorsal : Larva Anopheles .....	42
• Rajah - Pupa Anopheles .....	43
• Rajah - Kitaran hidup nyamuk Aedes .....	44
• Rajah - Kitaran hidup nyamuk Anopheles .....	45
• Rajah - Kitaran hidup nyamuk Culex .....	46
• Rajah - Kitaran hidup nyamuk Mansonia .....	47
• Rajah - Rajah perbandingan Anopheles & Culex .....	48

<b>RUJUKAN</b> .....	49
----------------------	----

**A**

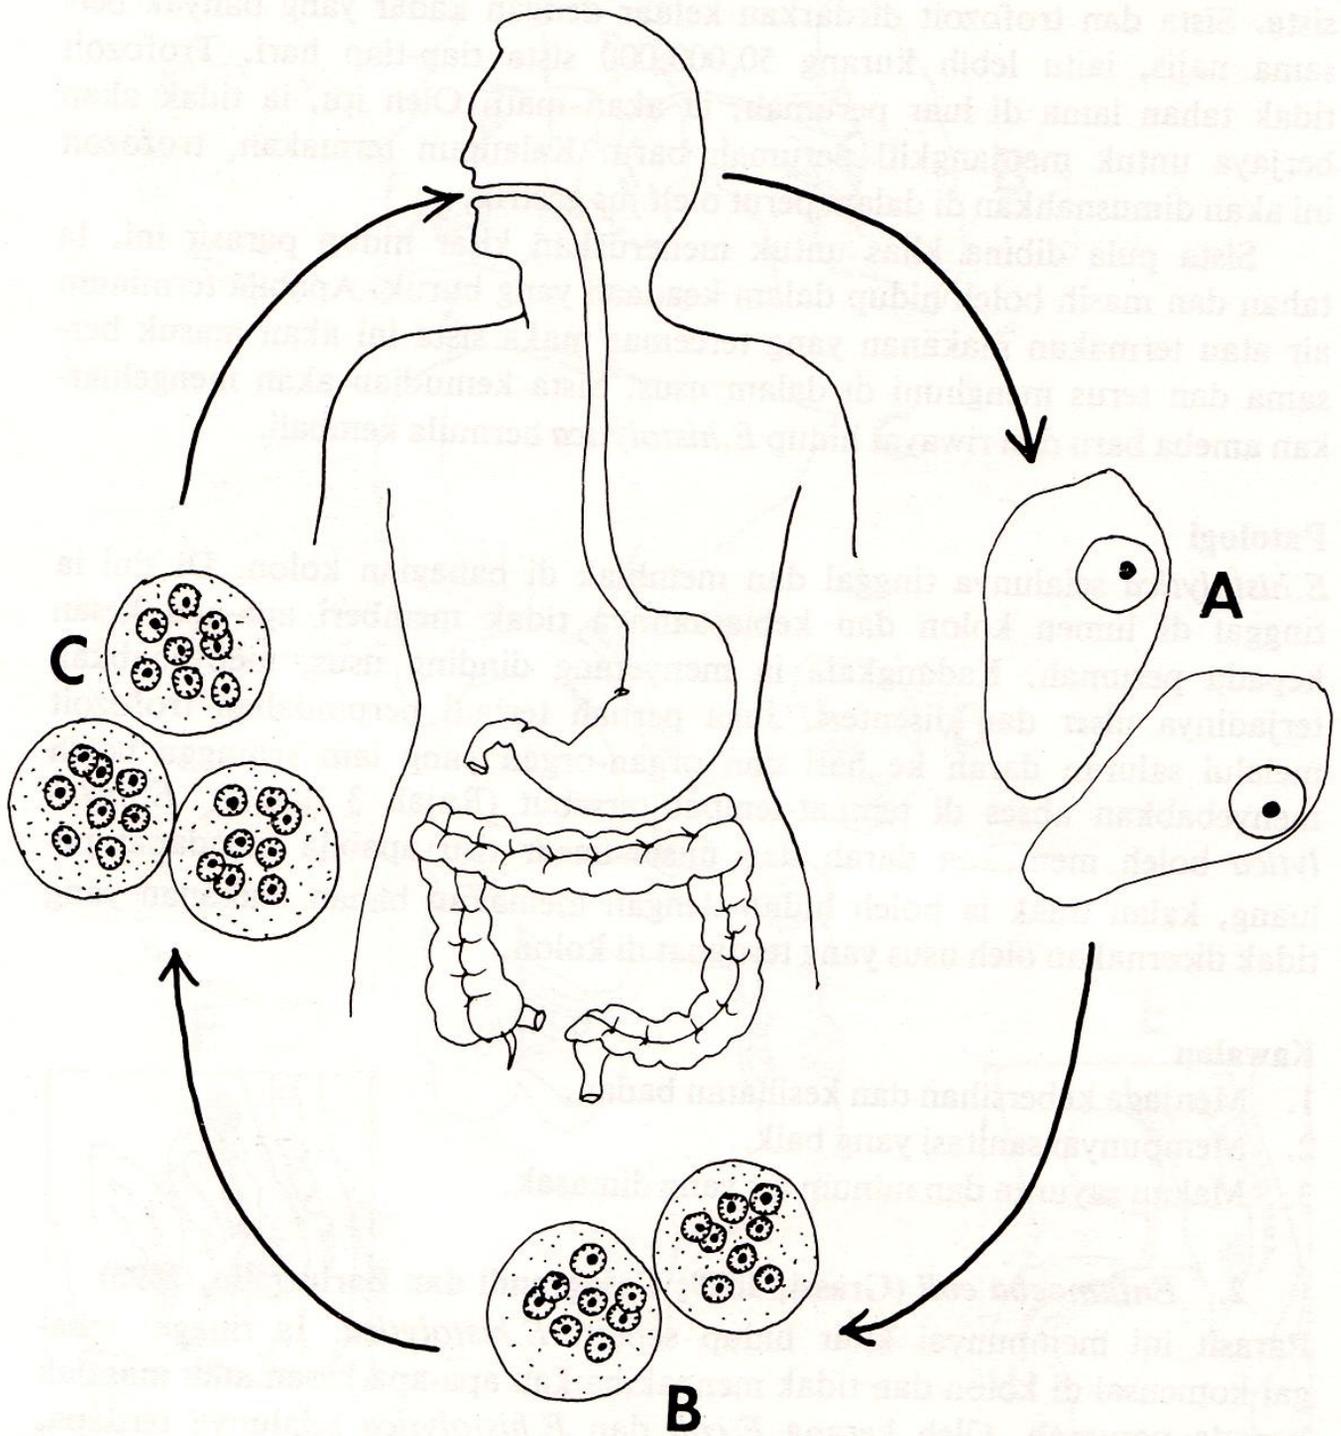

**B**

**Rajah 1**

A. *Entamoeba histolytica* – Trofozoit. 1. Pseudopodium. 2. Endoplasma. 3. Sel darah merah. 4. Membran nukleus. 5. Kariosom. 6. Ektoplasma.

B. *Entamoeba histolytica* – Sista. 1. Dinding sista. 2. Kromatin. 3. Lompang glikogen. 4. Nukleus.

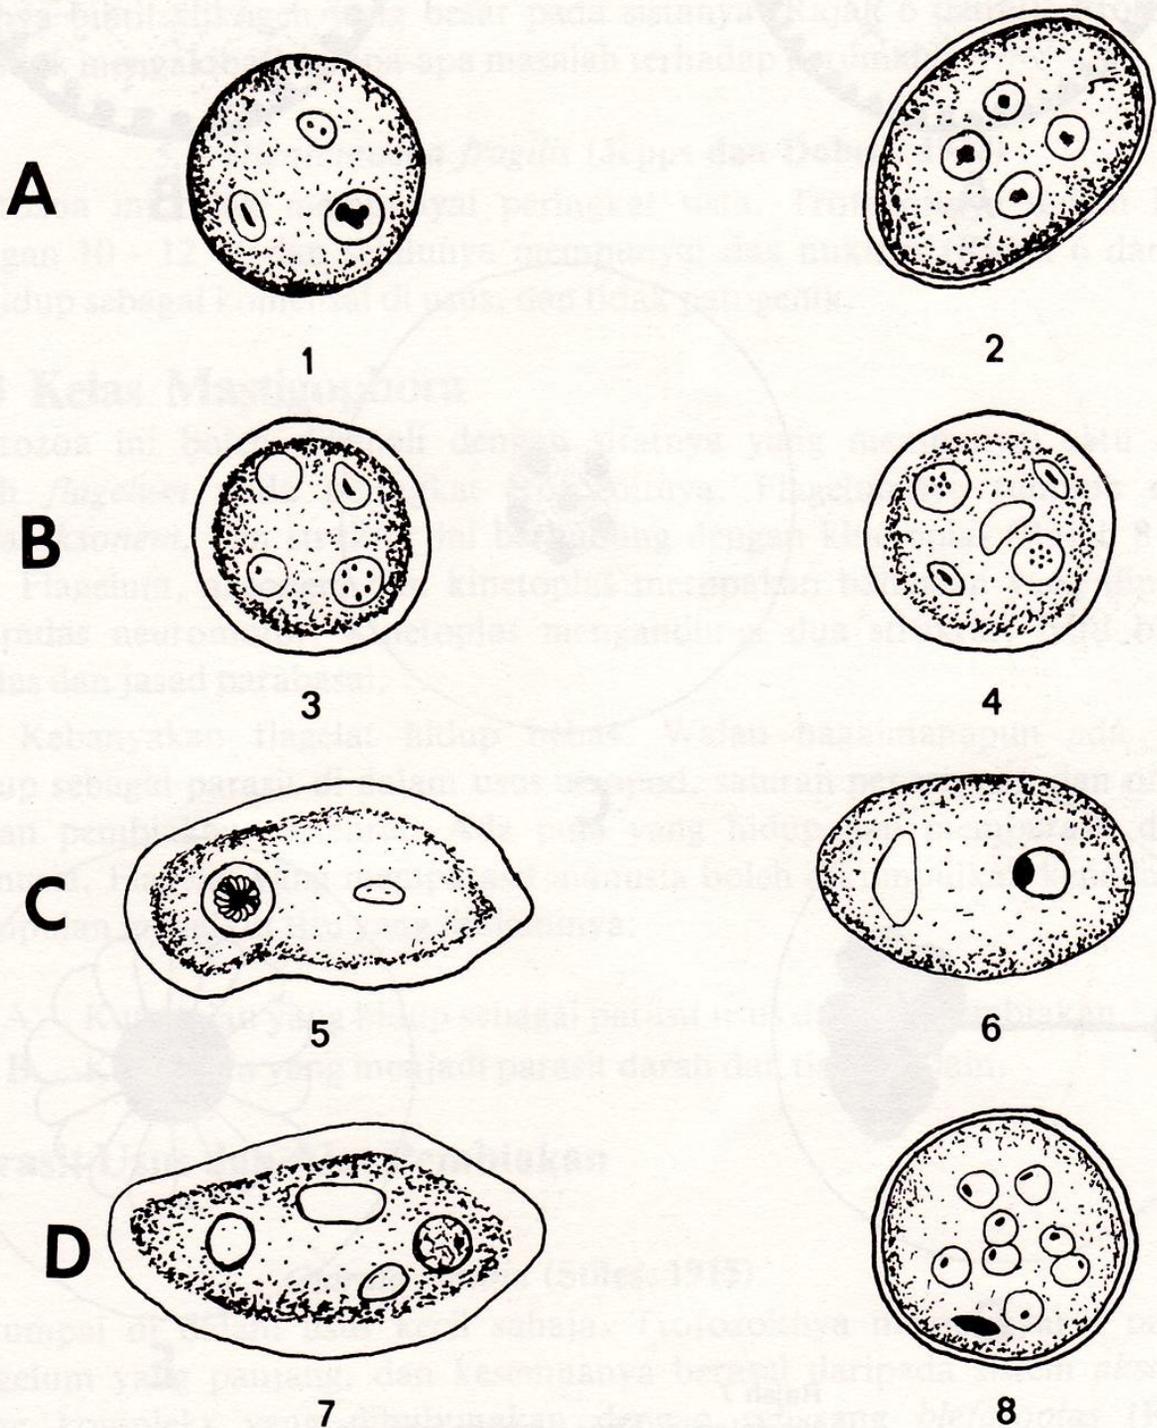

**Rajah 5**

Kita hidup *Entamoeba coli*.

A. Trofozoit di usus besar.

B. Sista keluar bersama najis.

C. Sista termasuk ke dalam badan manusia melalui air yang diminum atau makanan yang dimakan.

**Rajah 6**

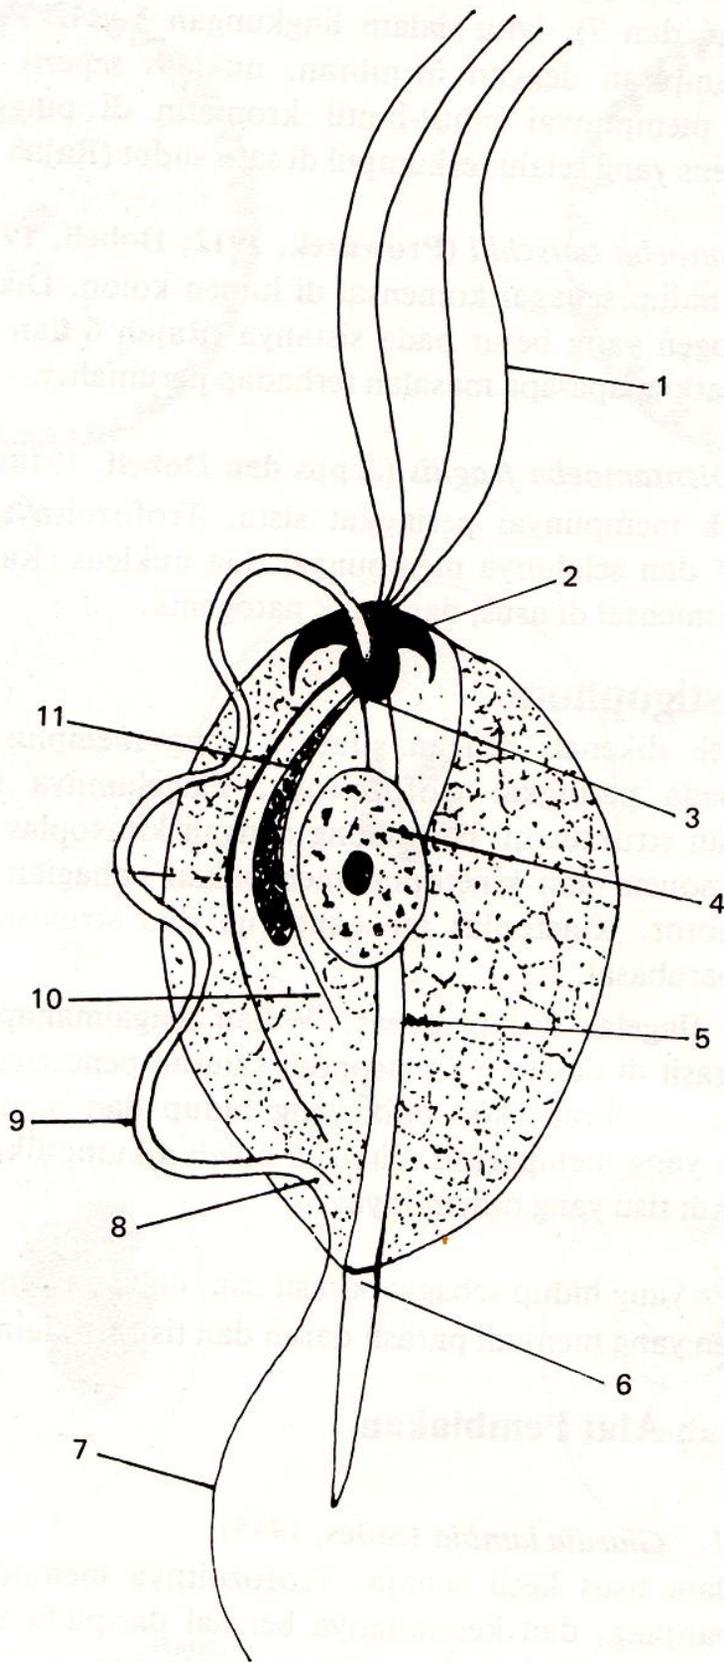

Parasit-parasit *Amoeba* manusia.

A. *Endolimax nana*. 1. Trofozoit. 2. Sista.

B. *Dientamoeba fragilis*. 3. Trofozoit (satu nukleus). 4. Trofozoit (dua nukleus).

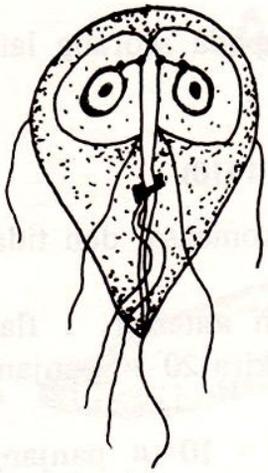

C. *Iodamoeba butschlii*. 5. Trofozoit. 6. Sista.

D. *Entamoeba coli*. 7. Trofozoit. 8. Sista.

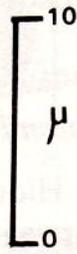

**Rajah 8**

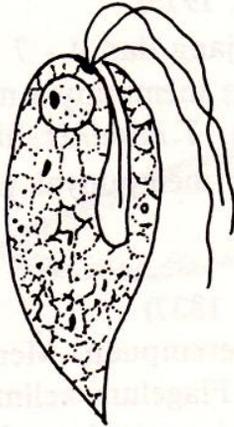

Struktur-struktur *Trichomonas*. 1. Flagelum anterior. 2. Pelta. 3. Jasad asas. 4. Nukleus. 5. Aksotil. 6. Cincin kromatik. 7. Flagelum bebas. 8. Filamen sekunder. 9. Membran bergelombang. 10. Filamen parabasal. 11. Jasad parabasal.

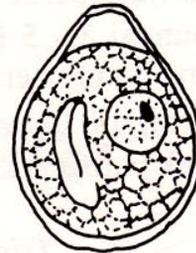

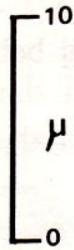

**A**

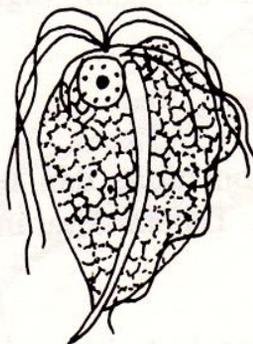

**B**

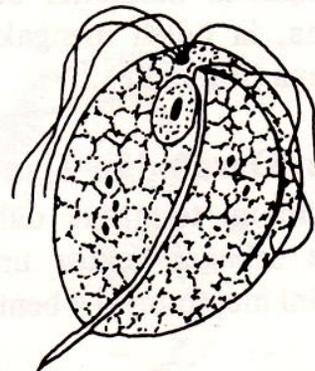

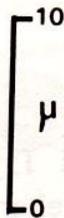

**C**

**D**

**E**

**F**

**Rajah 9**

Flagelat usus dan alat pembiakan manusia.

A. *Giardia lamblia* – trofozoit.

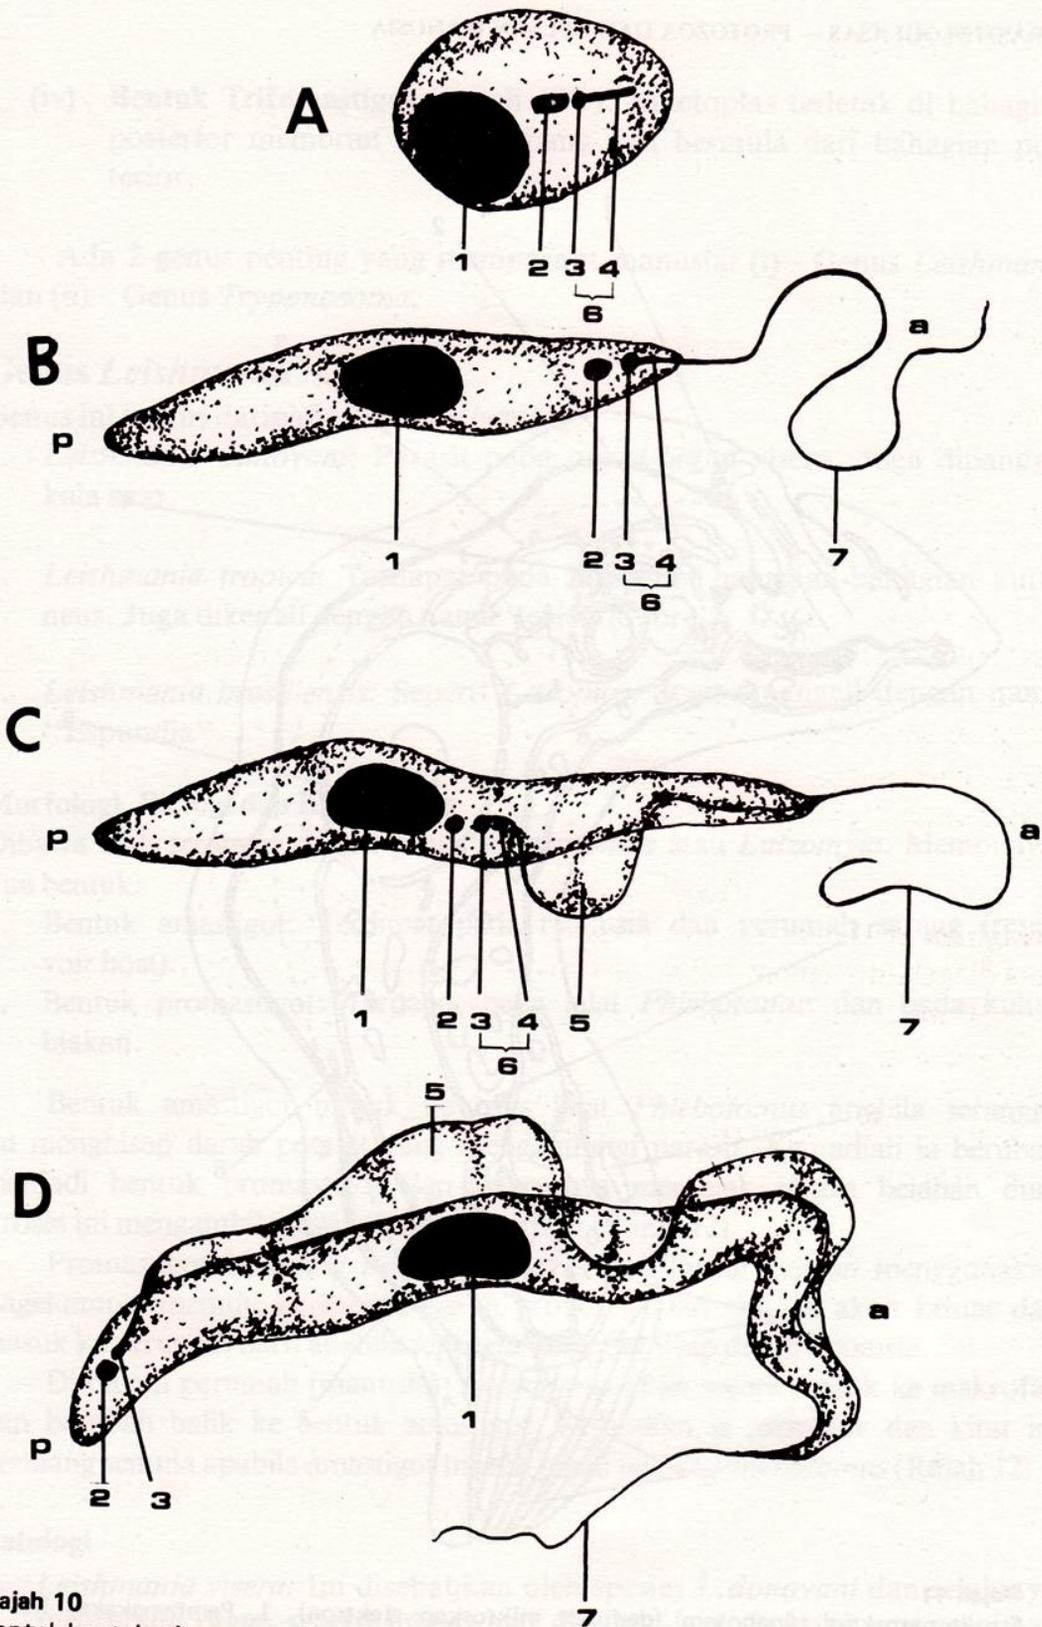

B. *Giardia lamblia* – sista.

C. *Chilomastix mesnili* – trofozoit.

D. *Chilomastix mesnili* – sista.

E. *Trichomonas hominis* – trofozoit.

F. *Trichomonas vaginalis* – trofozoit.

**Rajah 10**

Bentuk-bentuk tripanosom di dalam darah.

A. Amastigot.

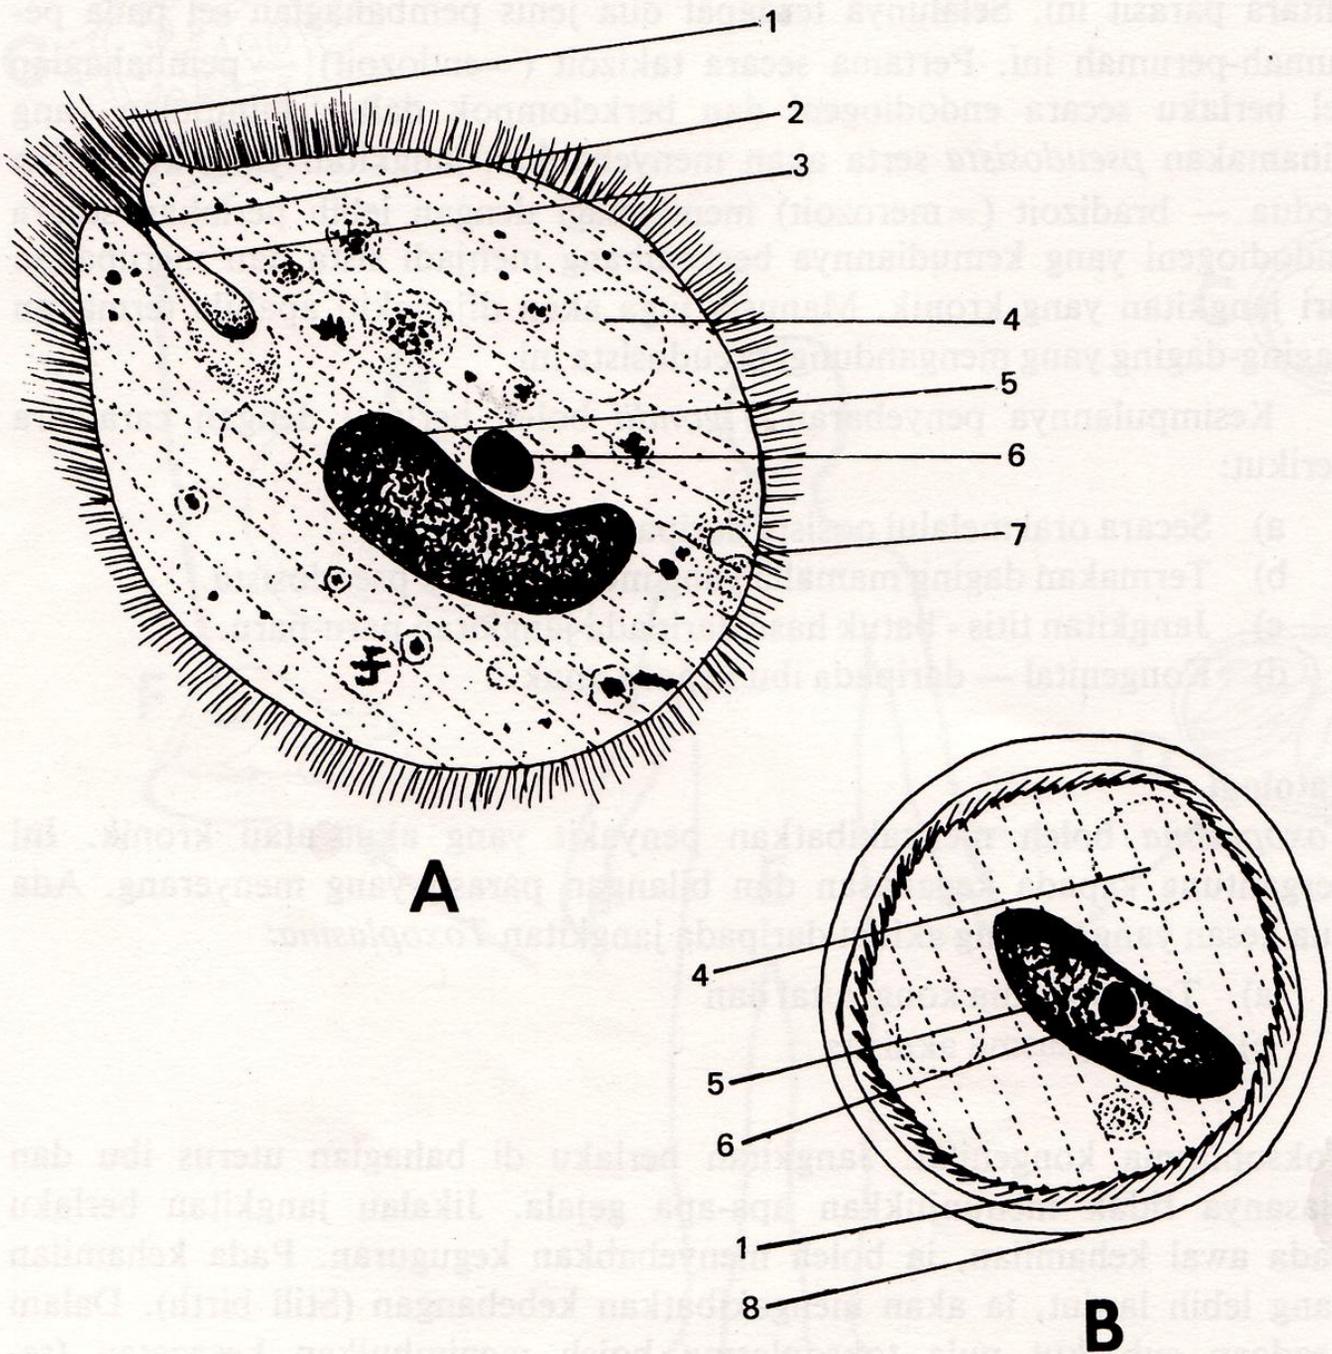

B. Promastigot.

C. Epimastigot.

D. Tripomastigot.

1. Nukleus. 2. Jasad parabasal. 3. Blefaroplas. 4. Aksonem. 5. Membran bergelombang. 6. Kinetoplas. 7. Flagelum.

a – anterior p – posterior

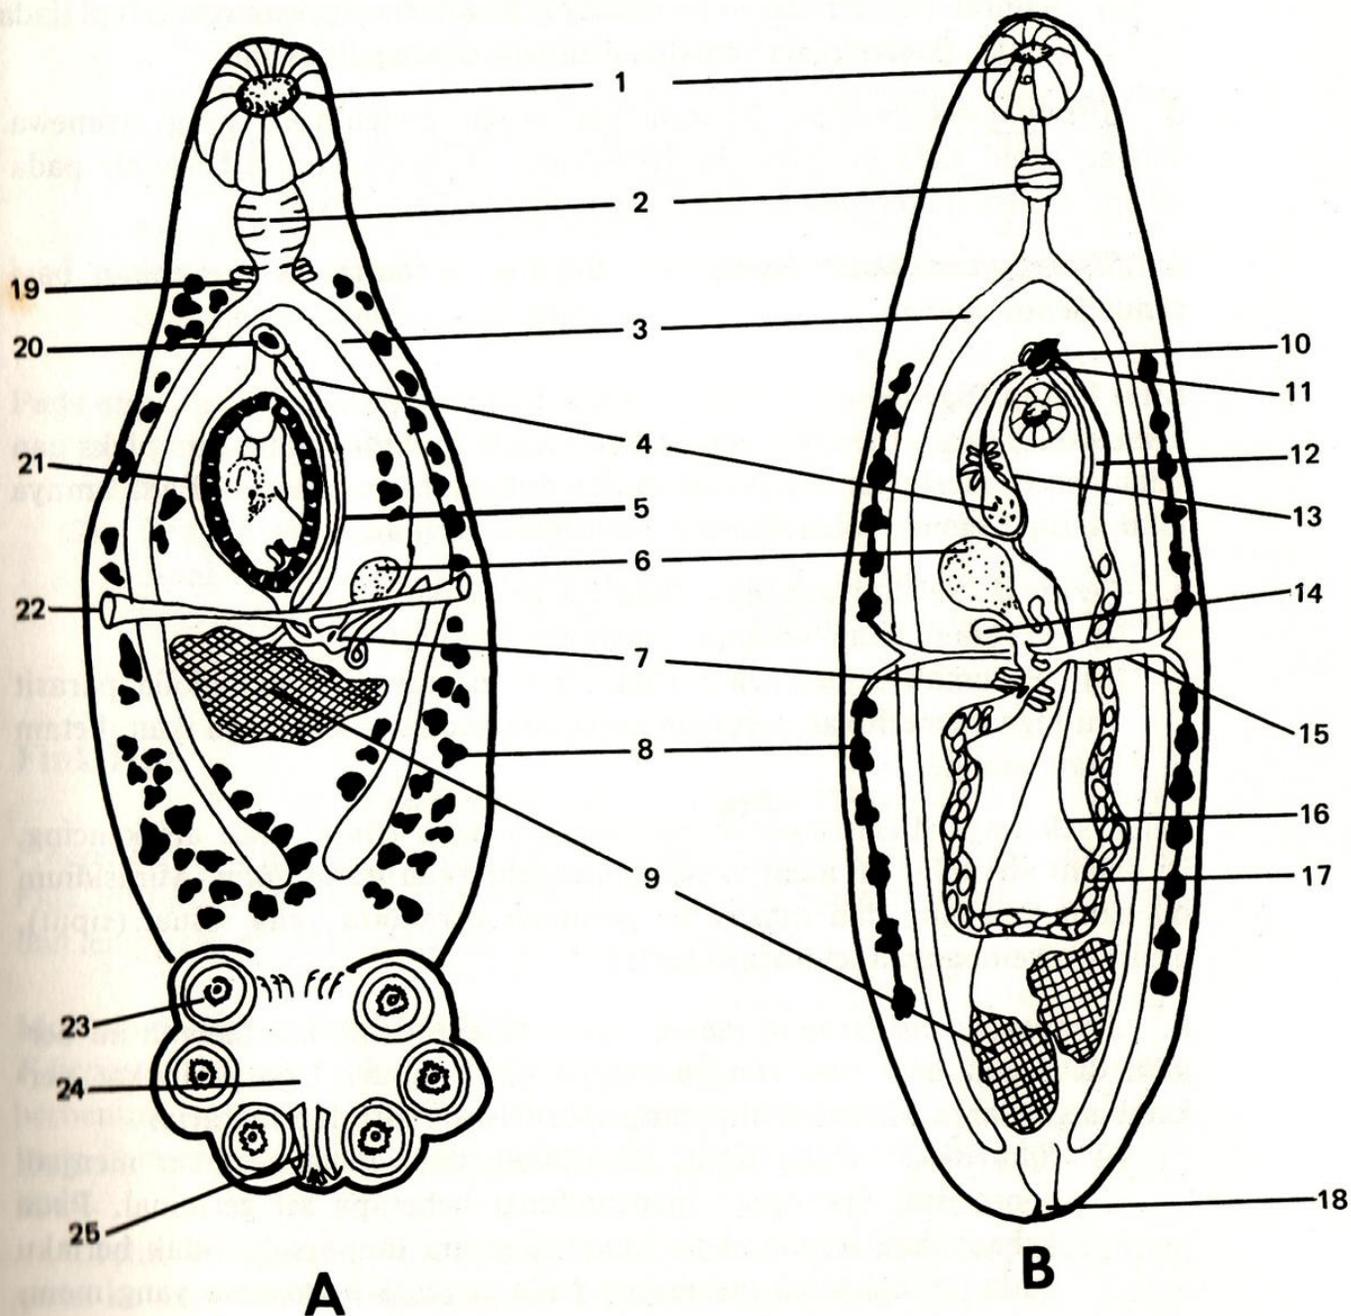

**Rajah 18**

*Balantidium coli*.

A. Trofozoit.

B. Sista.

1. Silia. 2. Sitostom. 3. Sitofaraks. 4. Lompang mengecut. 5. Makronukleus. 6. Mikro-nukleus. 7. Sitopij. 8. Dinding sista.

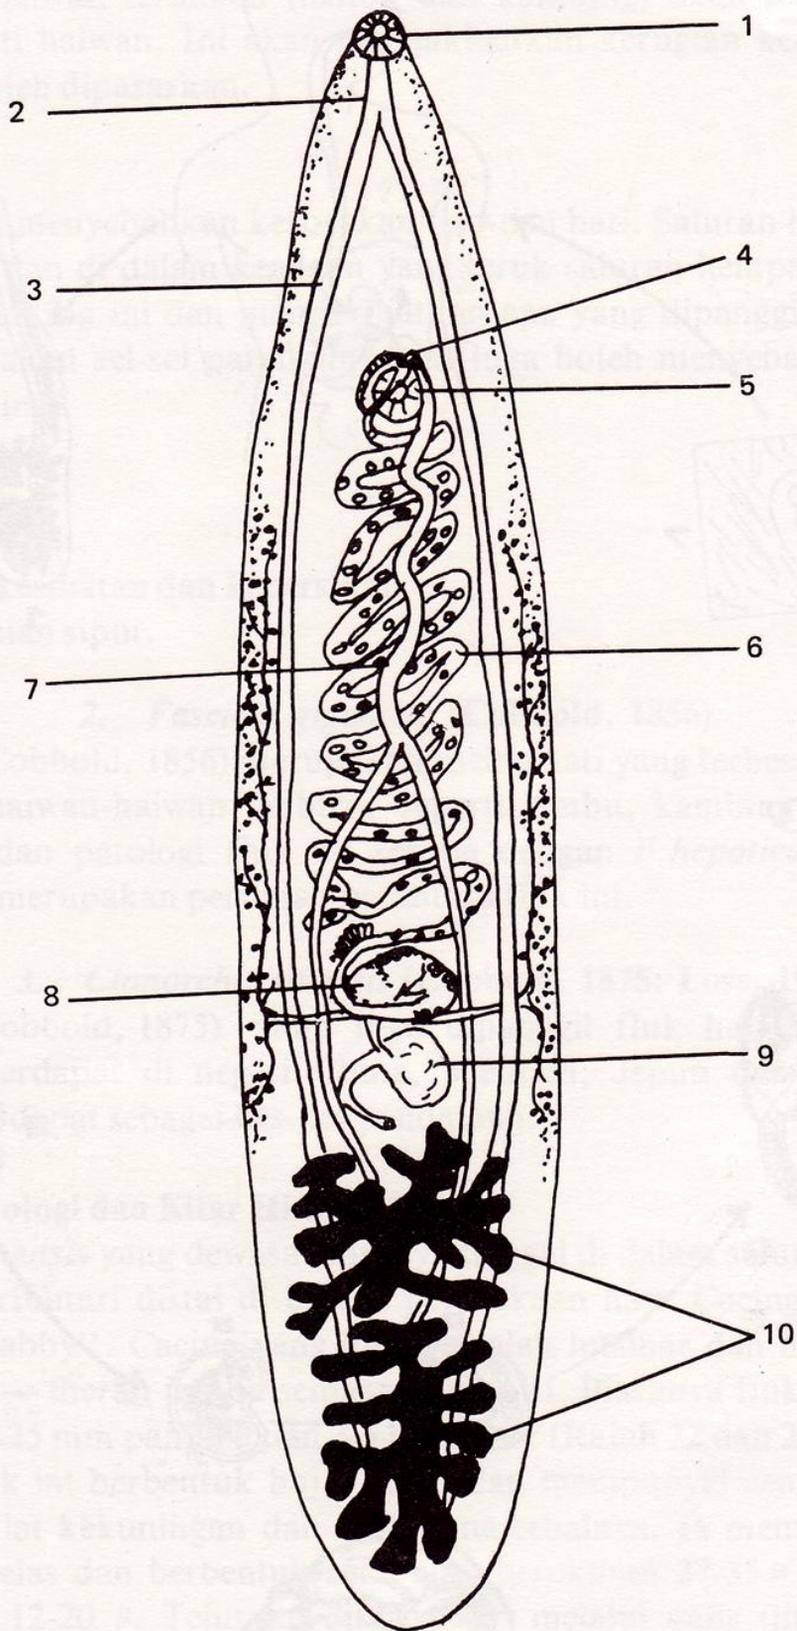

**Rajah 20**

Rajah skema trematod

A. Monogenea.

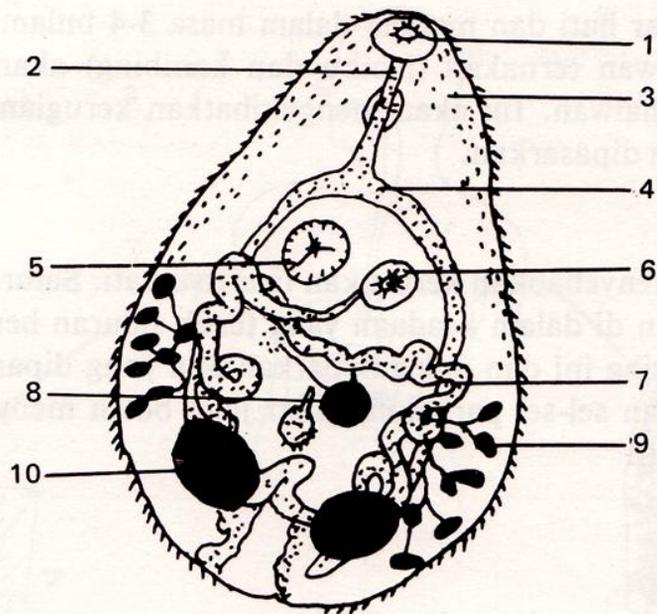

B. Digenea.

1. Pelekat oral. 2. Faring. 3. Sekum. 4. Vesikel seminal. 5. Duktus sperma. 6. Ovari.  
 7. Ootaip. 8. Vitellaria. 9. Testis. 10. Sirus. 11. 'Genital atrium'. 12. Vagina. 13. Pundi sirus.  
 14. Reseptakel seminal. 15. Duktus vitellaria. 16. Vas eferens. 17. Uterus. 18. Liang perkumuhan.  
 19. Kelenjar esofagus. 20. Liang genital. 21. Uterus. 22. Vagina. 23. Pelekat. 24. 'Opisthaptor'. 25. Cangkuk (haptor).

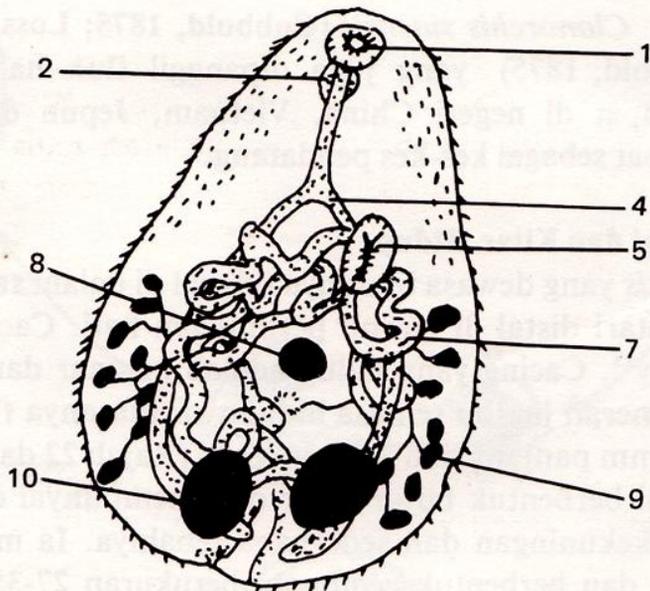

**Rajah 22**

Morfologi *Clonorchis sinensis*. 1. Pelekat oral. 2. Faring. 3. Usus. 4. Liang genital. 5. Pelekat ventral. 6. Uterus. 7. Vas deferentia. 8. Ovari. 9. Reseptakel seminal. 10. Testis.

**A**

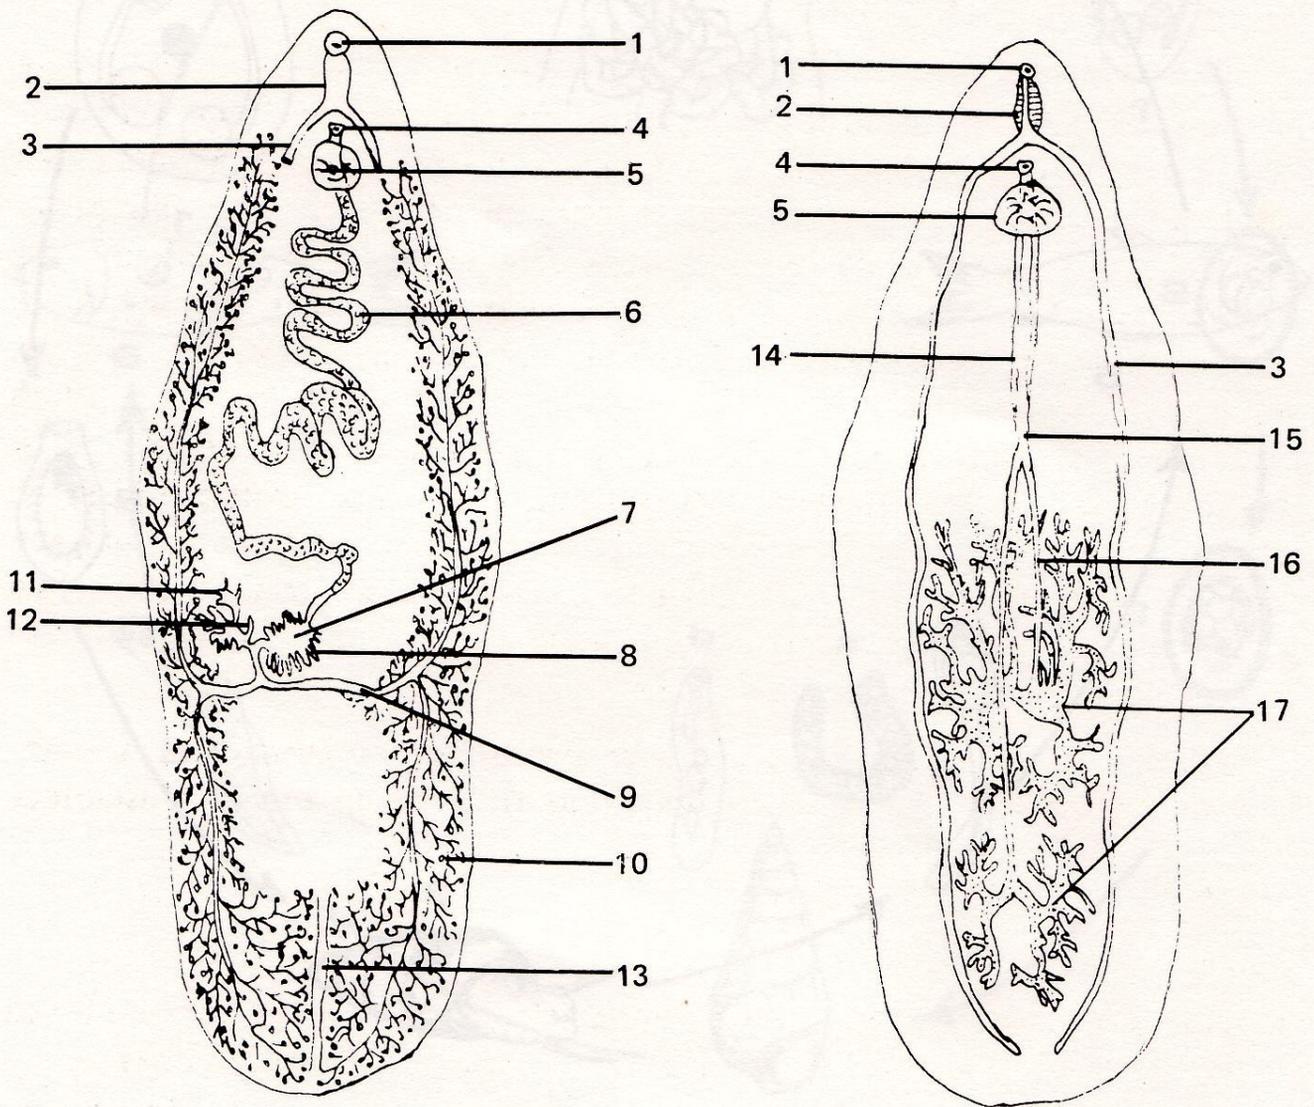

**B**

**Rajah 24**

A. Morfologi *Heterophyes heterophyes*.

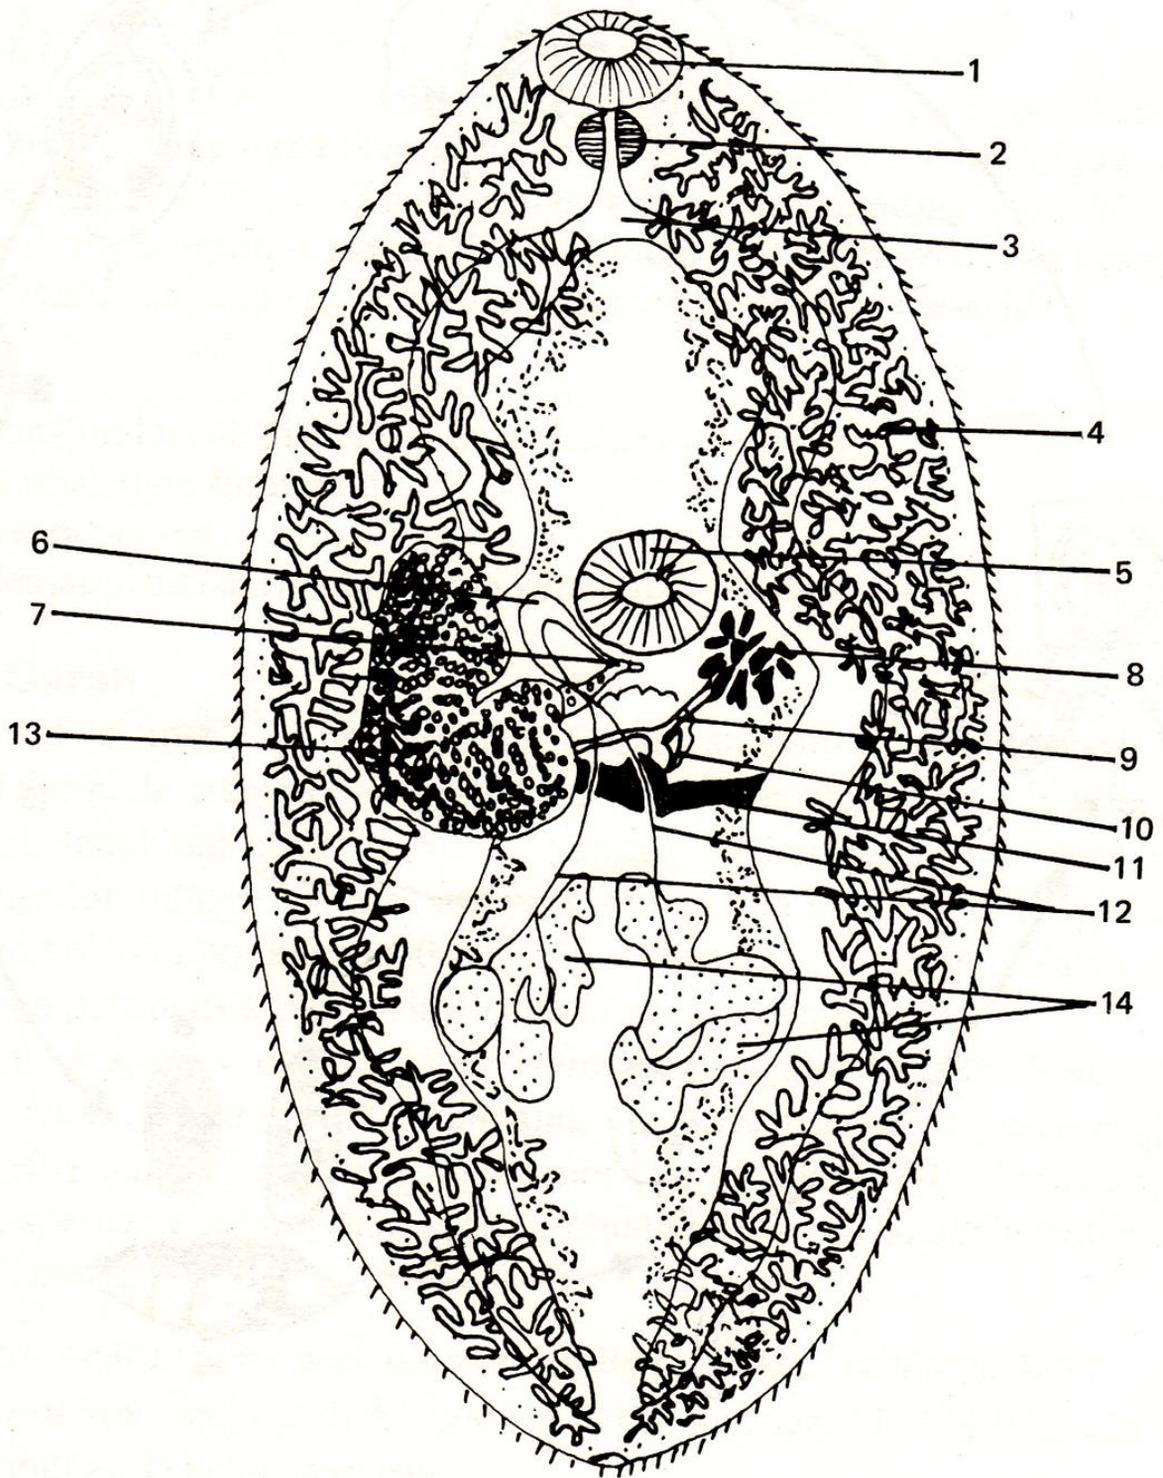

B. Morfologi *Metagonimus yokogawi*.

1. Pelekat oral. 2. Faring. 3. Sisik. 4. Sekum. 5. Pelekat ventral. 6. Pelekat genital. 7. Uterus. 8. Ovari. 9. Vitelaria. 10. Testis.

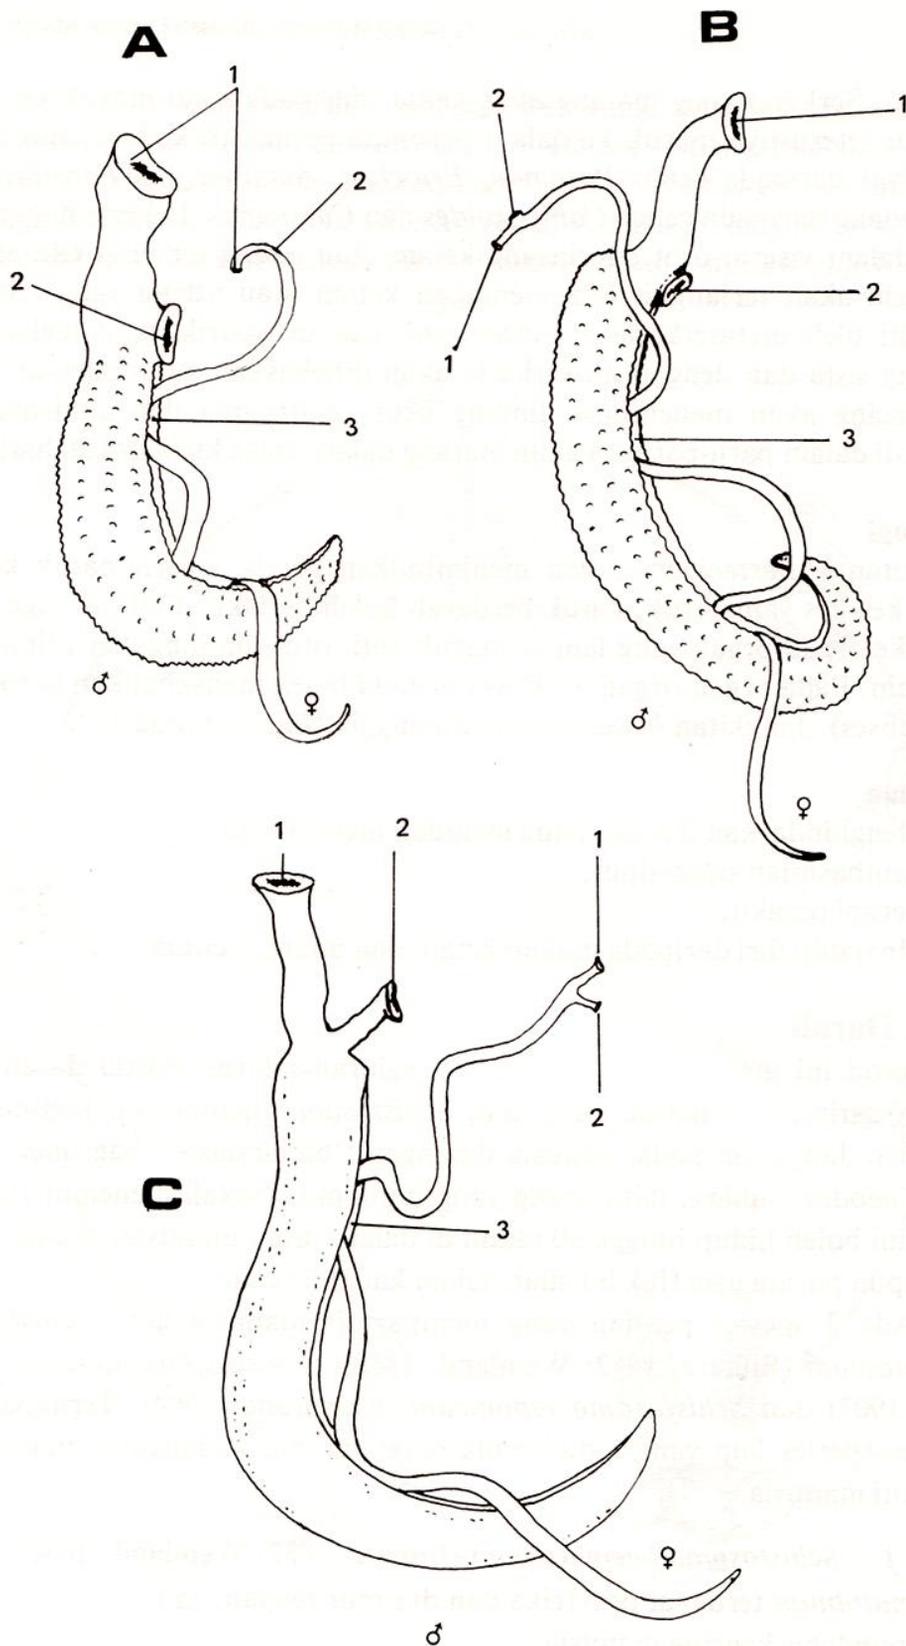

**Rajah 27**

Morfologi *Fasciolopsis buski*. 1. Pelekat oral. 2. Faring. 3. Sekum. 4. Genital atrium. 5. Pelekat ventral. 6. Uterus. 7. Ootaip. 8. Kelenjar Mahlis. 9. Duktus vitellaria. 10. Vetelarium. 11. Ovari. 12. Saluran Lamers. 13. Pundi. 14. Vesikel seminal. 15. Vas deferens. 16. Vas eferens. 17. Testis.

**Rajah 29**

Morfologi *Paragonimus westermani*. 1. Pelekat oral. 2. Faring. 3. Sekum. 4. Kelenjar yolka. 5. Asetabulum. 6. Pundi sirus. 7. Gonofor. 8. Ovari. 9. Oviduktus. 10. Ootaip. 11. Duktus yolka. 12. Duktus sperma. 13. Uterus. 14. Testis.

**Rajah 31**

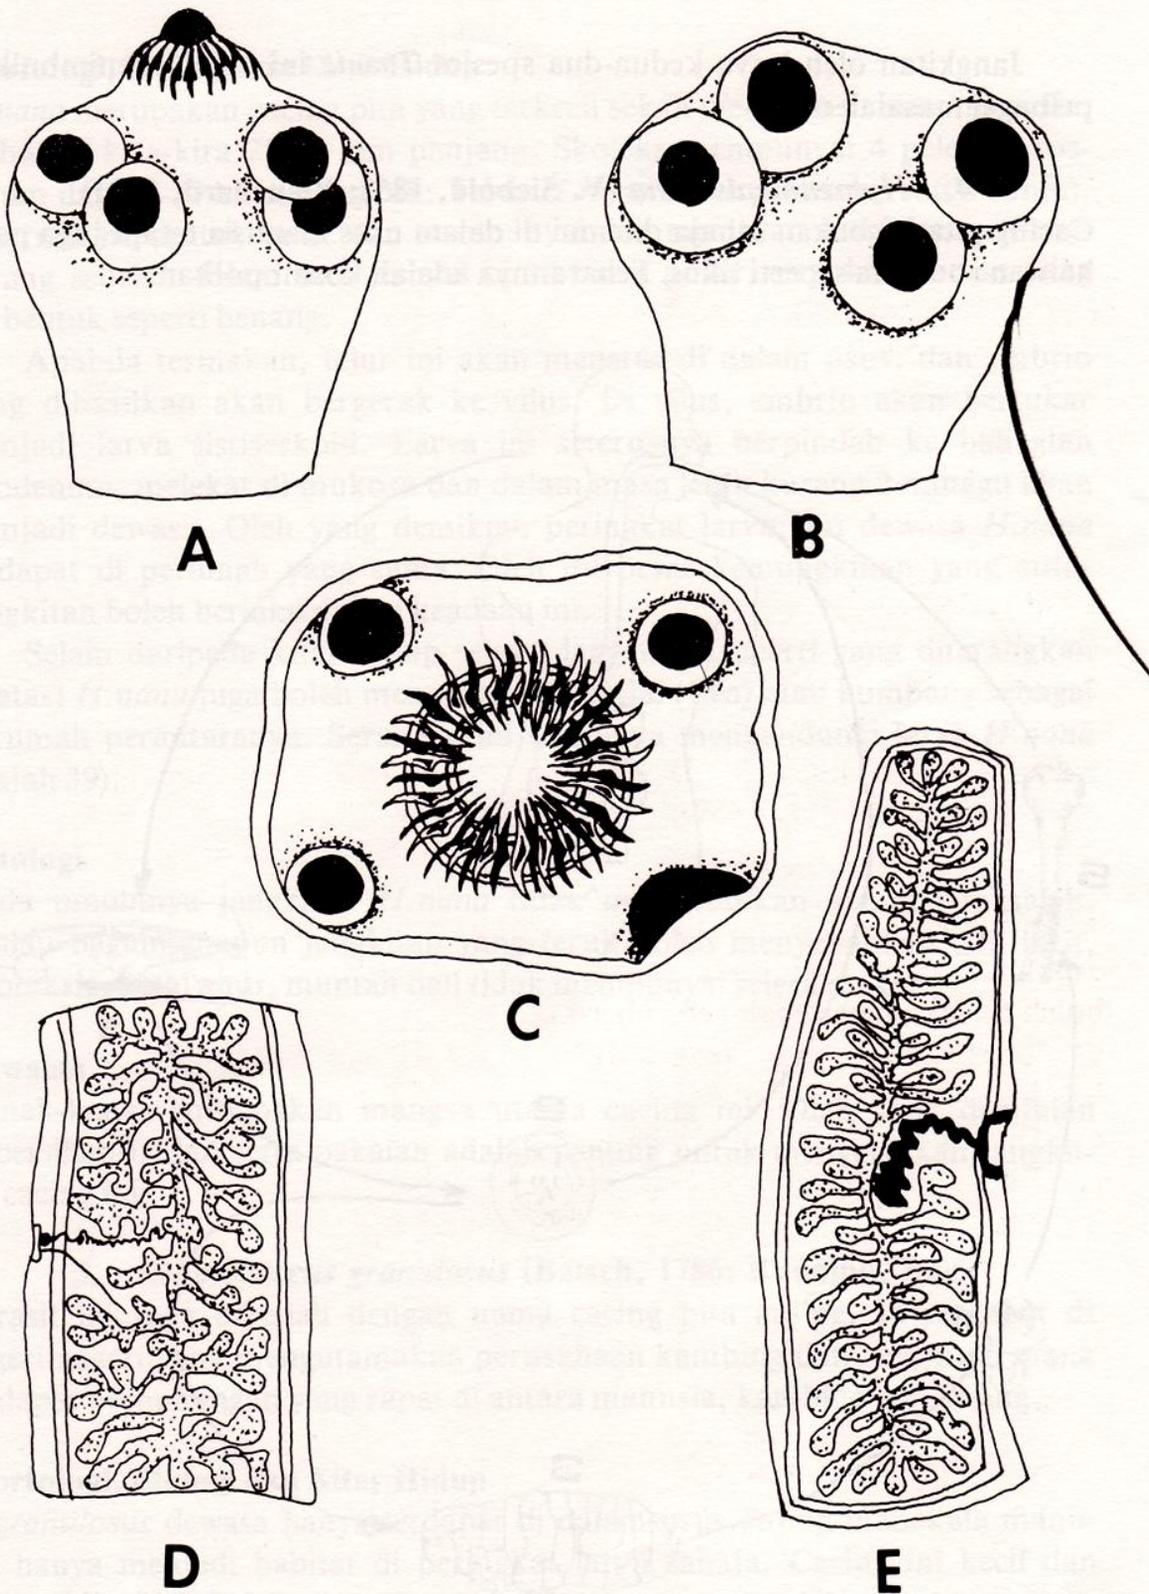

Morfologi *Schistosoma* manusia.

A. *Schistosoma haematobium*.

B. *Schistosoma mansoni*.

C. *Schistosoma japonicum*.

1. Pelekat oral. 2. Pelekat ventral. 3. Saluran ginekofor.

**Rajah 38**

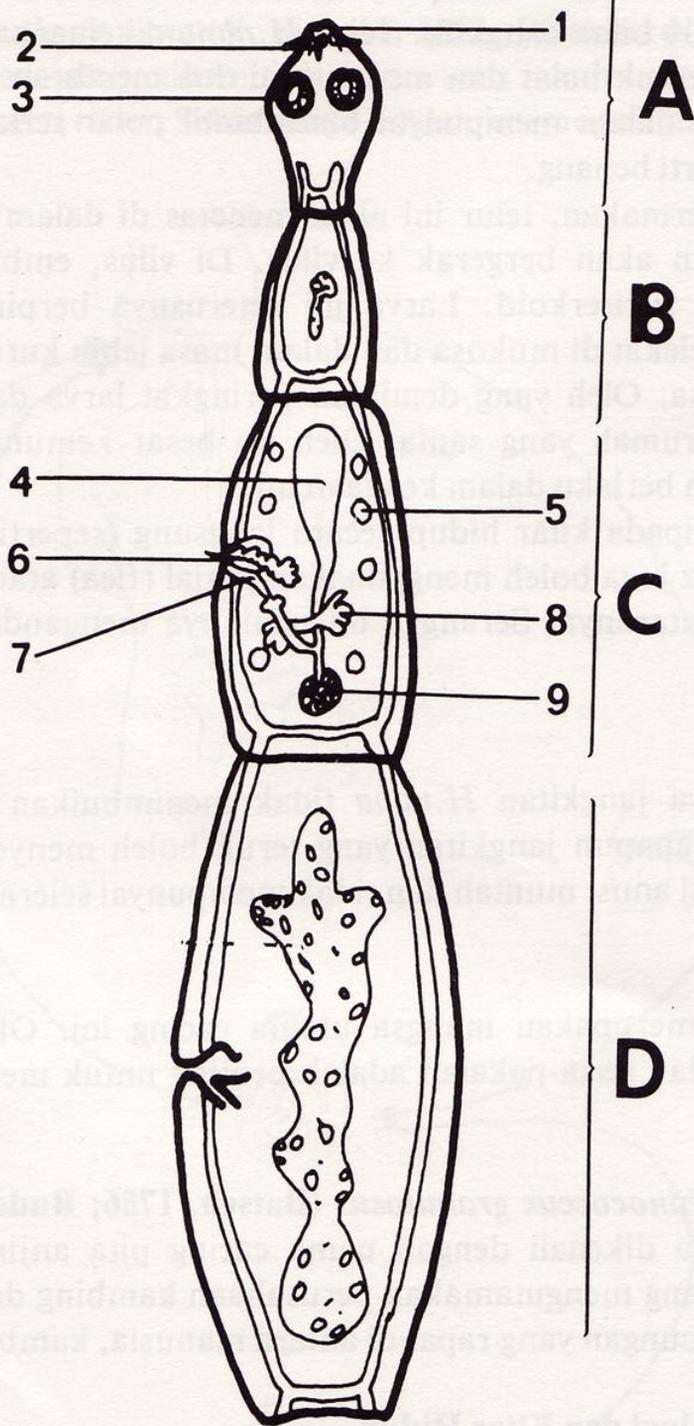

Morfologi skoleks dan proglotid gravid cacing pita.

A & C. Skoleks *Taenia solium*.

B. Skoleks *Taenia saginata*.

D. Proglotid *T. solium*.

E. Proglotid *T. saginata*.

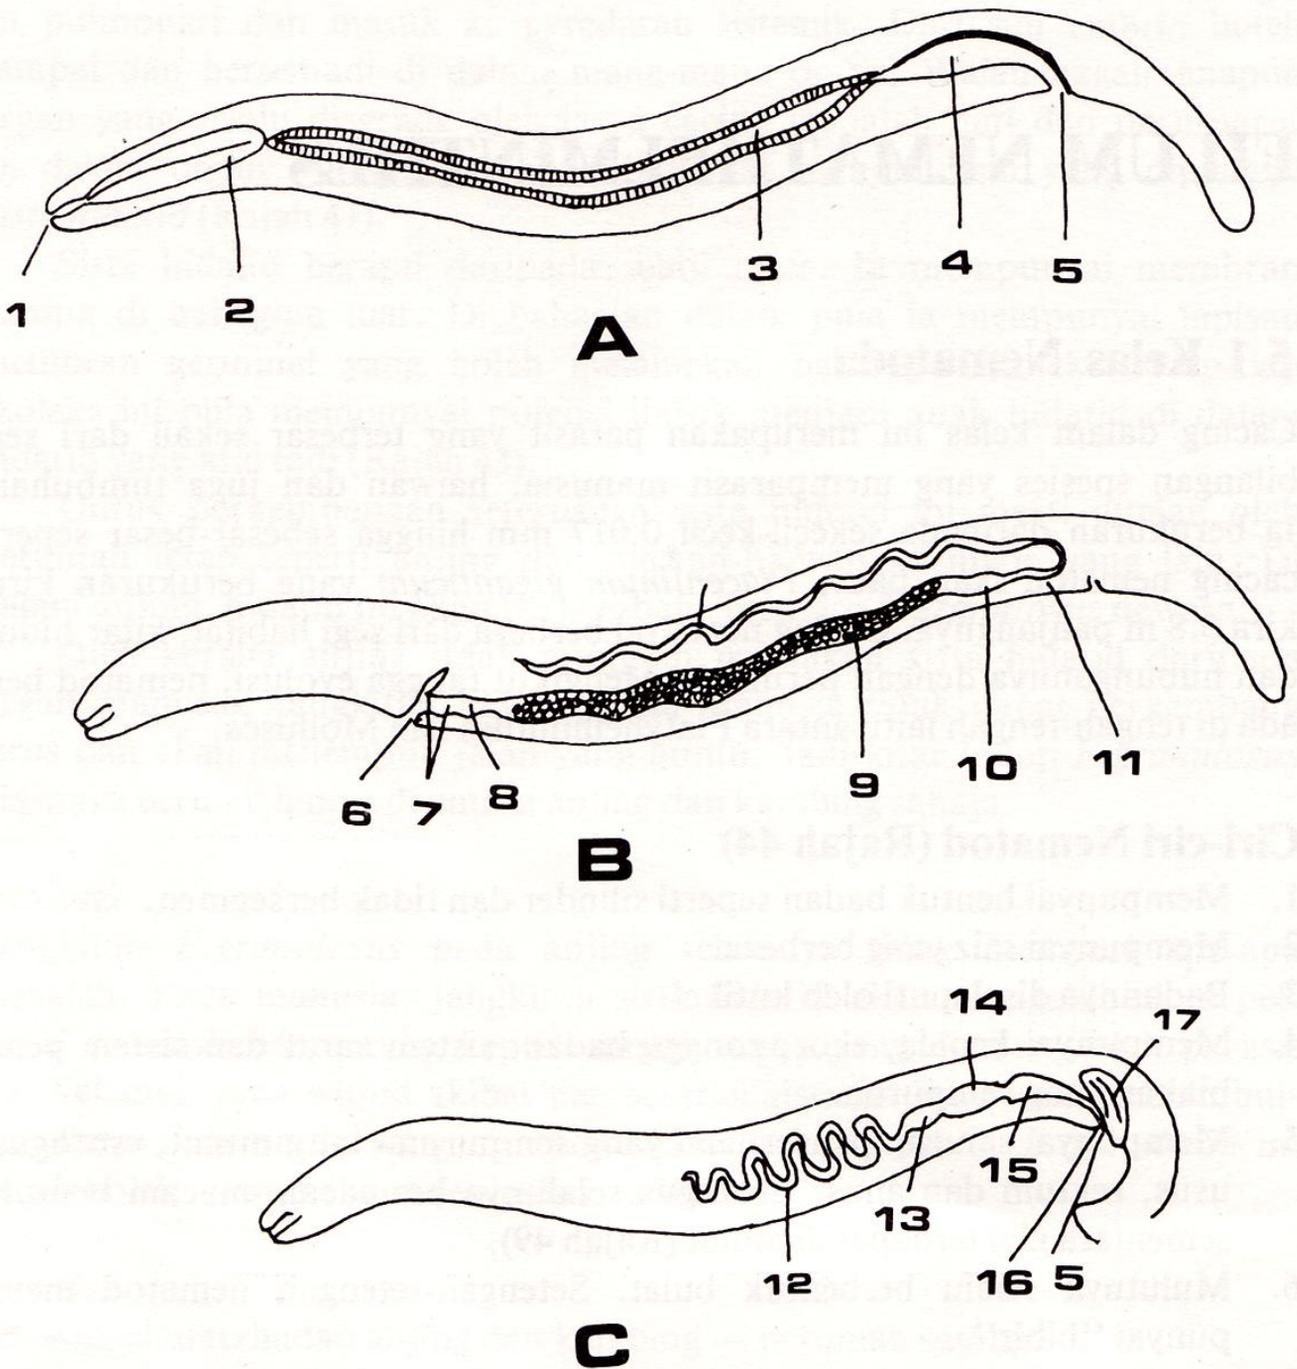

**Rajah 40**

*Echinococcus granulosces.*

- A. Skoleks.
- B. Proglotid muda.
- C. Proglotid matang.
- D. Proglotid gravid.

1. Rostelum. 2. Cangkuk. 3. Pelekat. 4. Uterus. 5. Testis. 6. Liang genital. 7. Vagina. 8. Ovari. 9. Kelenjar vitelin.

**Rajah 44**

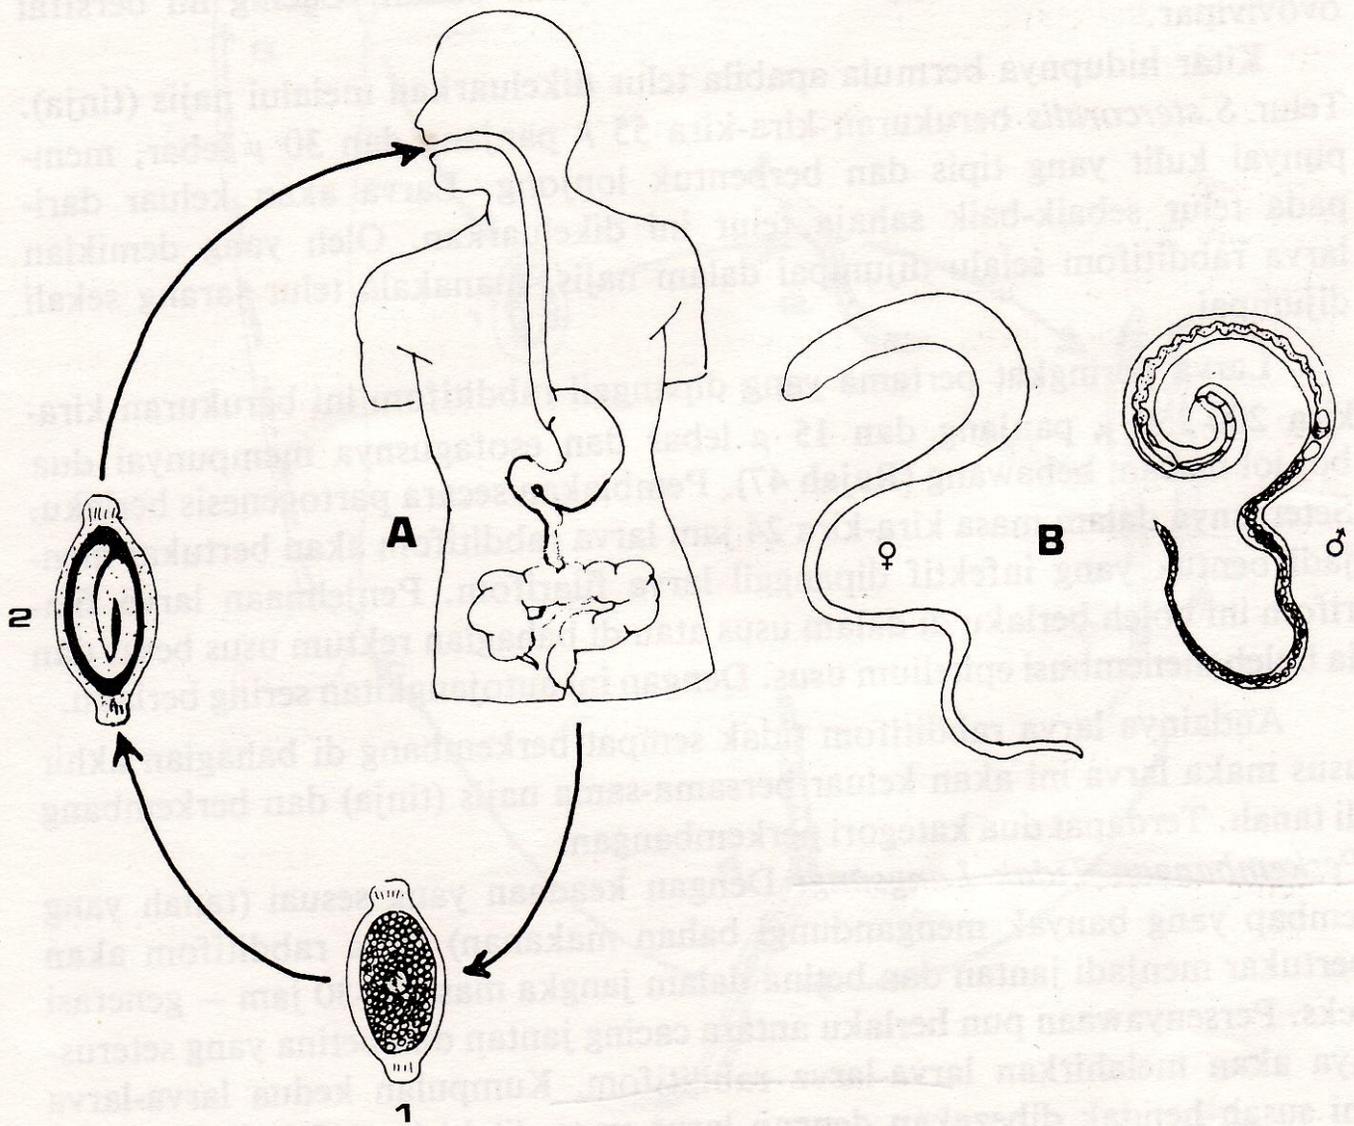

Marfologi cacing Nematoda.

A. Sistem pencernaan.

B. Sistem pembiakan ♀.

C. Sistem pembiakan ♂.

1. Mulut. 2. Esofagus. 3. Usus. 4. Rektum. 5. Anus. 6. Valva. 7. Vagina. 8. Ovejektor. 9. Uterus. 10. Reseptakel seminal. 11. Oviduk. 12. Testis. 13. Vas deferens. 14. Vesikel seminal. 15. Duktus pemancutan. 16. Kloaka. 17. Spikula.

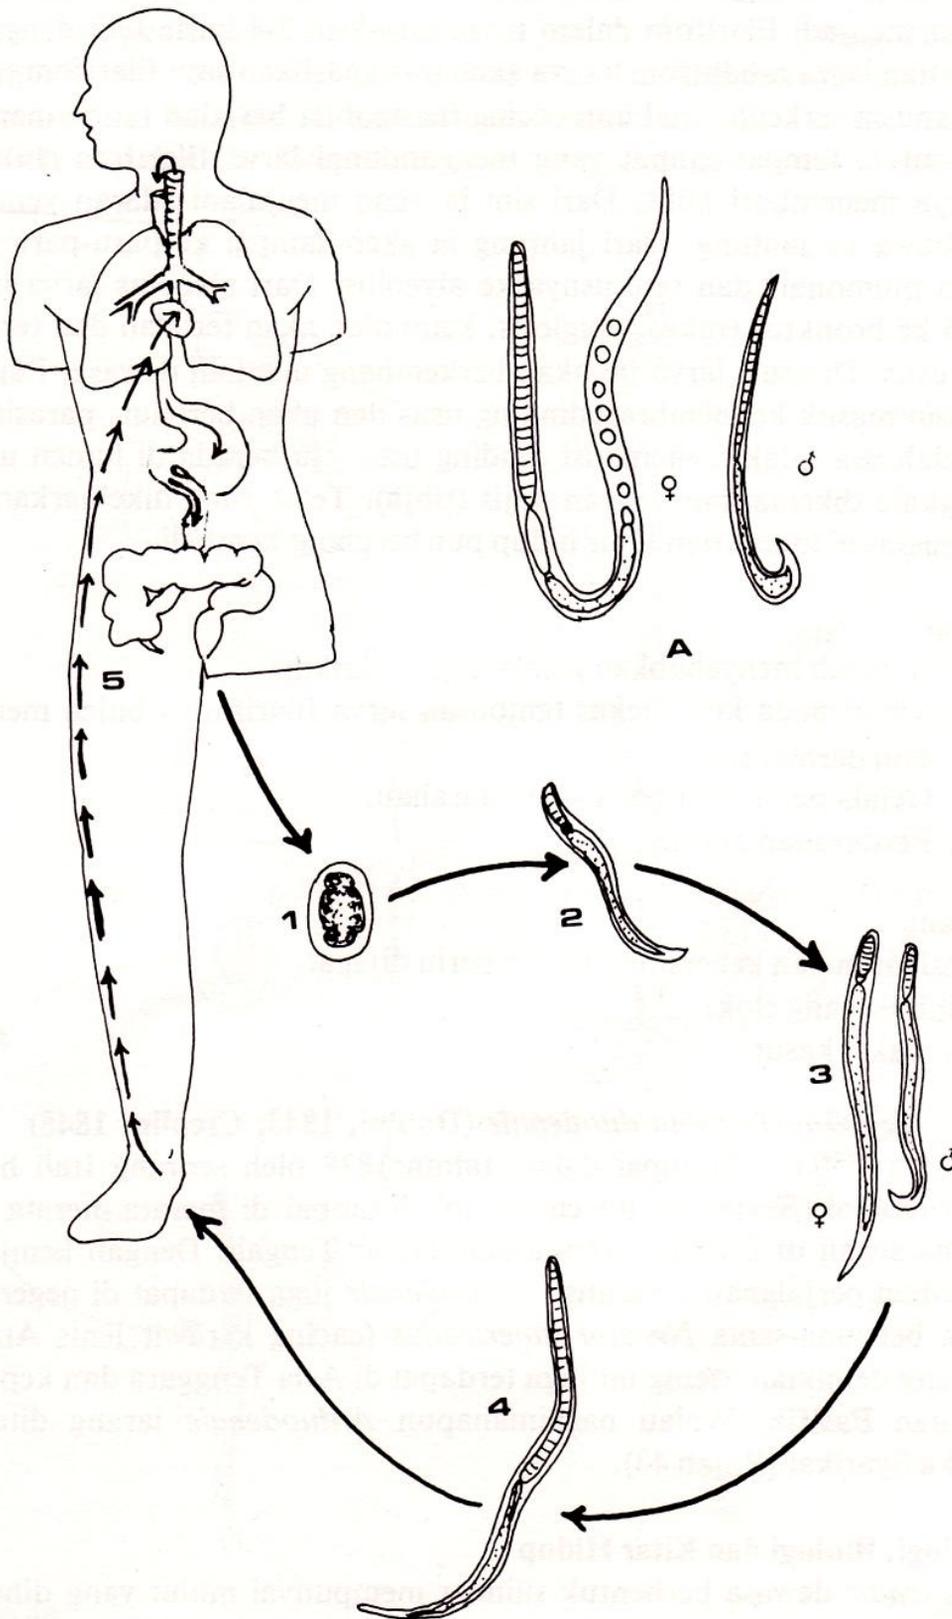

**Rajah 46**

Kitar hidup *Trichuris trichura*.

A. Kitaran pada manusia.

B. *T. trichura* dewasa.

1. Telur keluar bersama najis. 2. Jangkitan melalui mulut.

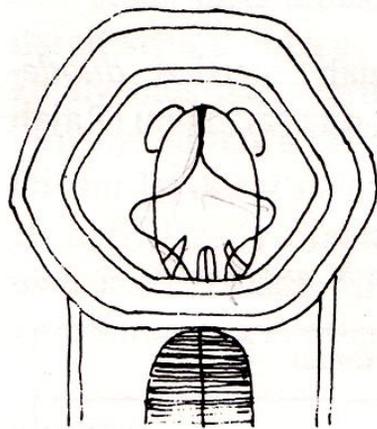

**Rajah 47**

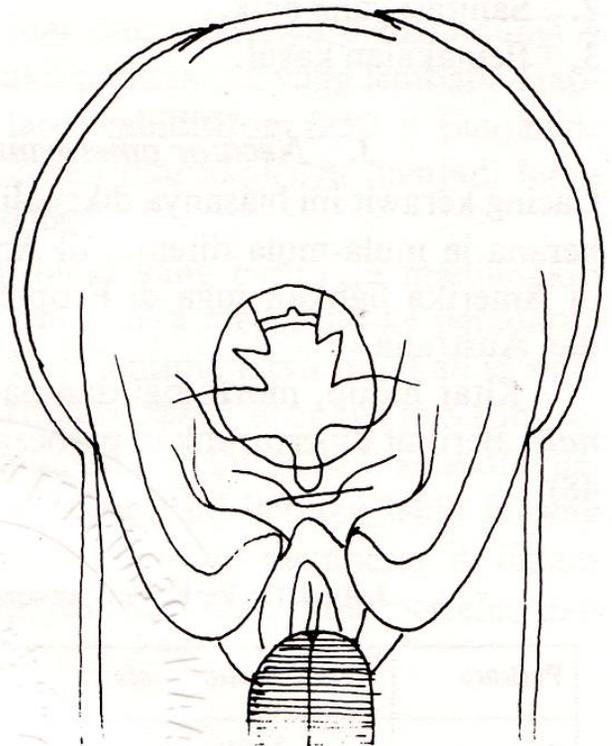

Kitar hidup *Strongyloides stercoralis*.

A. *S. stercoralis* dewasa.

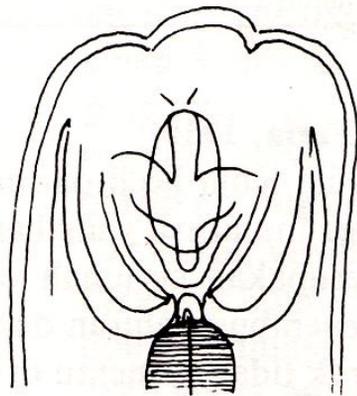

1. Telur keluar bersama-sama najis. 2. Larva rhabditiform. 3. Menjelma menjadi cacing jantan dan cacing betina. 4. Larva filariform. 5. Migrasi larva filariform sebelum menghuni di usus.

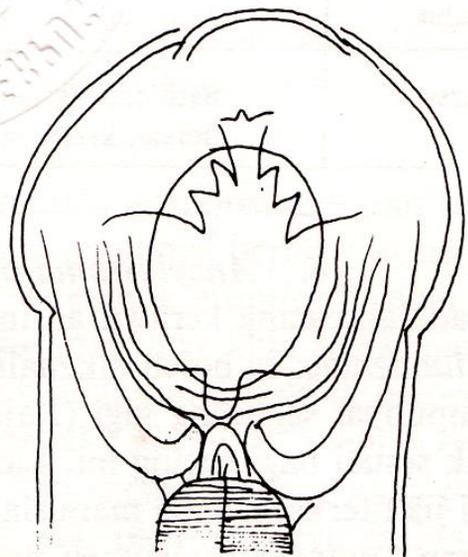

**A**

**B**

**C**

**D**

**Rajah 49**

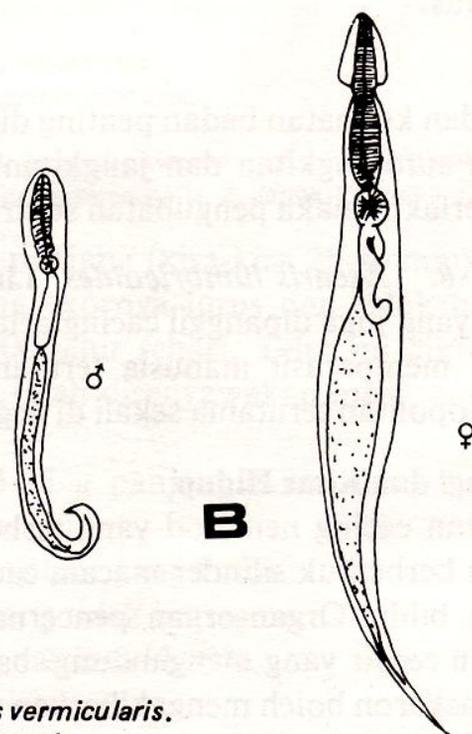

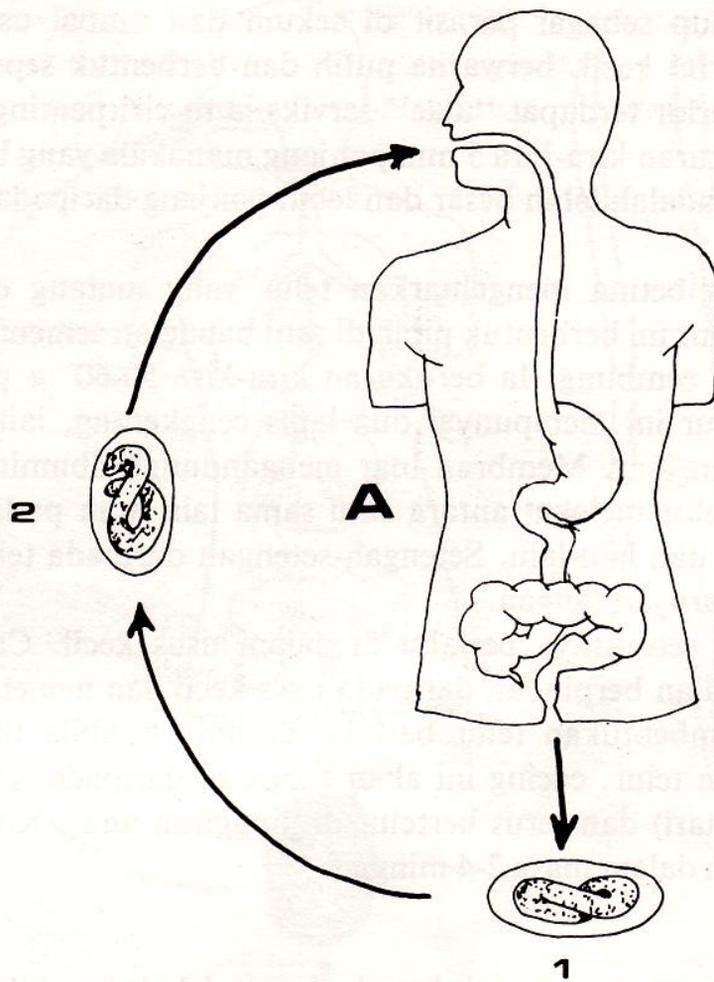

Anatomi rongga mulut cacing kerawit.

A. *Necator americanus*.

B. *Ancylostoma duodenale*.

C. *Ancylostoma braziliense*.

D. *Ancylostoma caninum*.

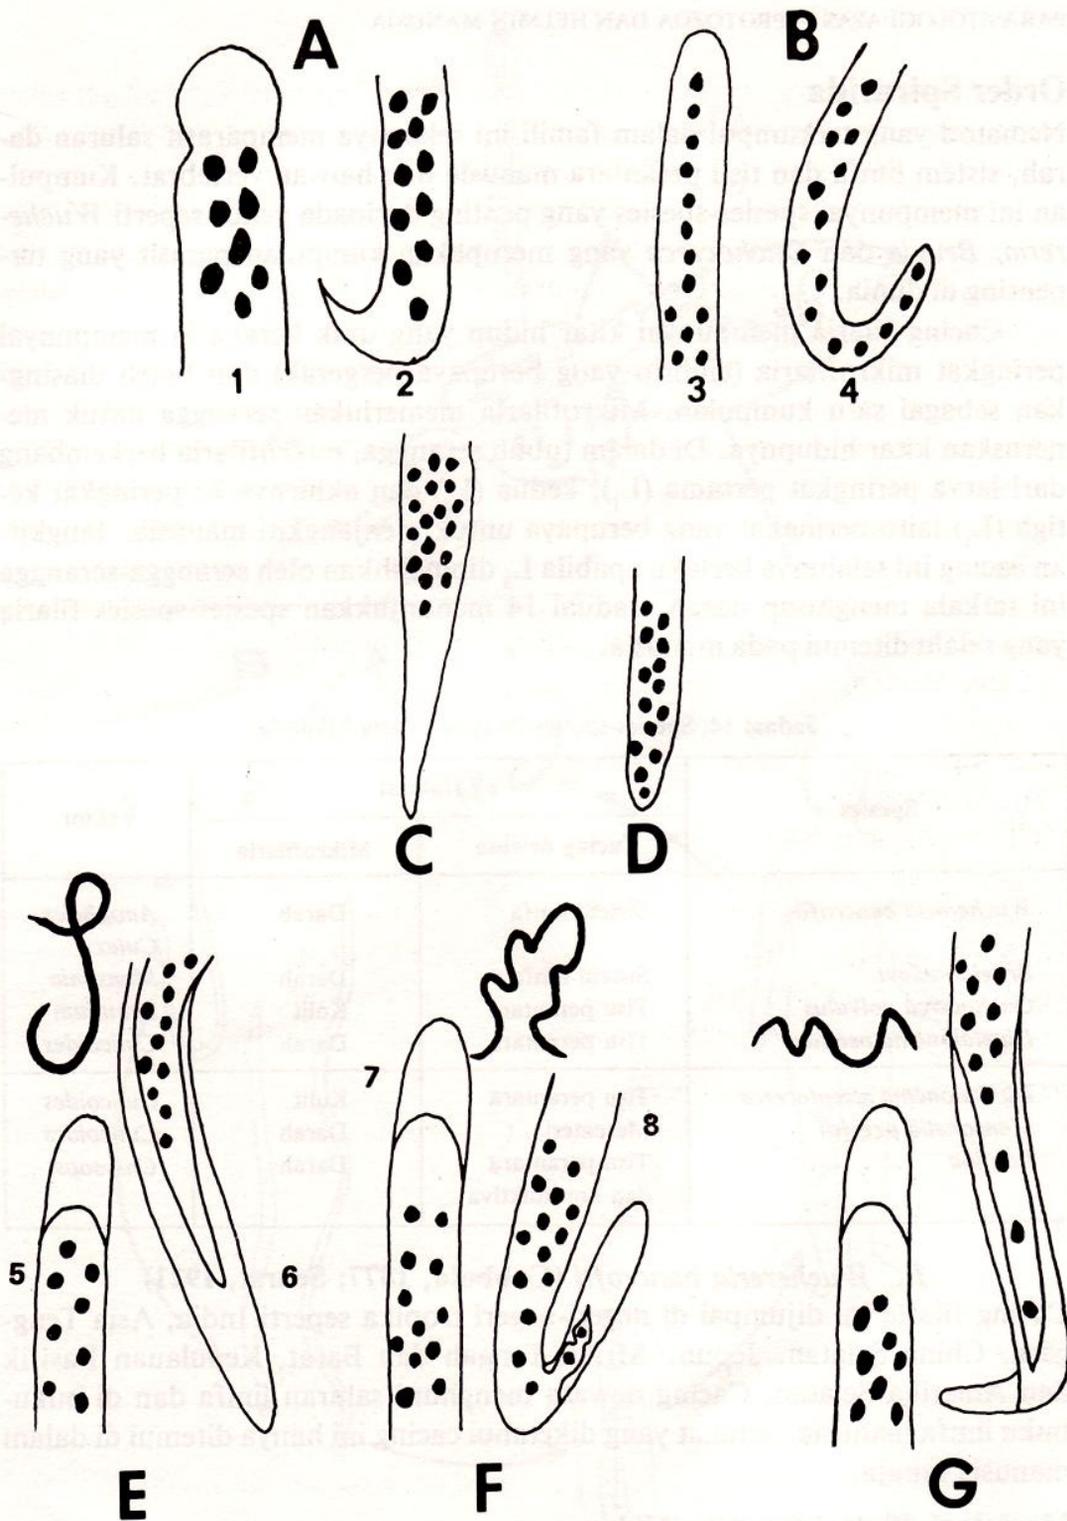

**Rajah 50**

Kitar hidup *Enterobius vermicularis*.

A. Kitaran di dalam manusia .

B. *E. vermicularis* dewasa.

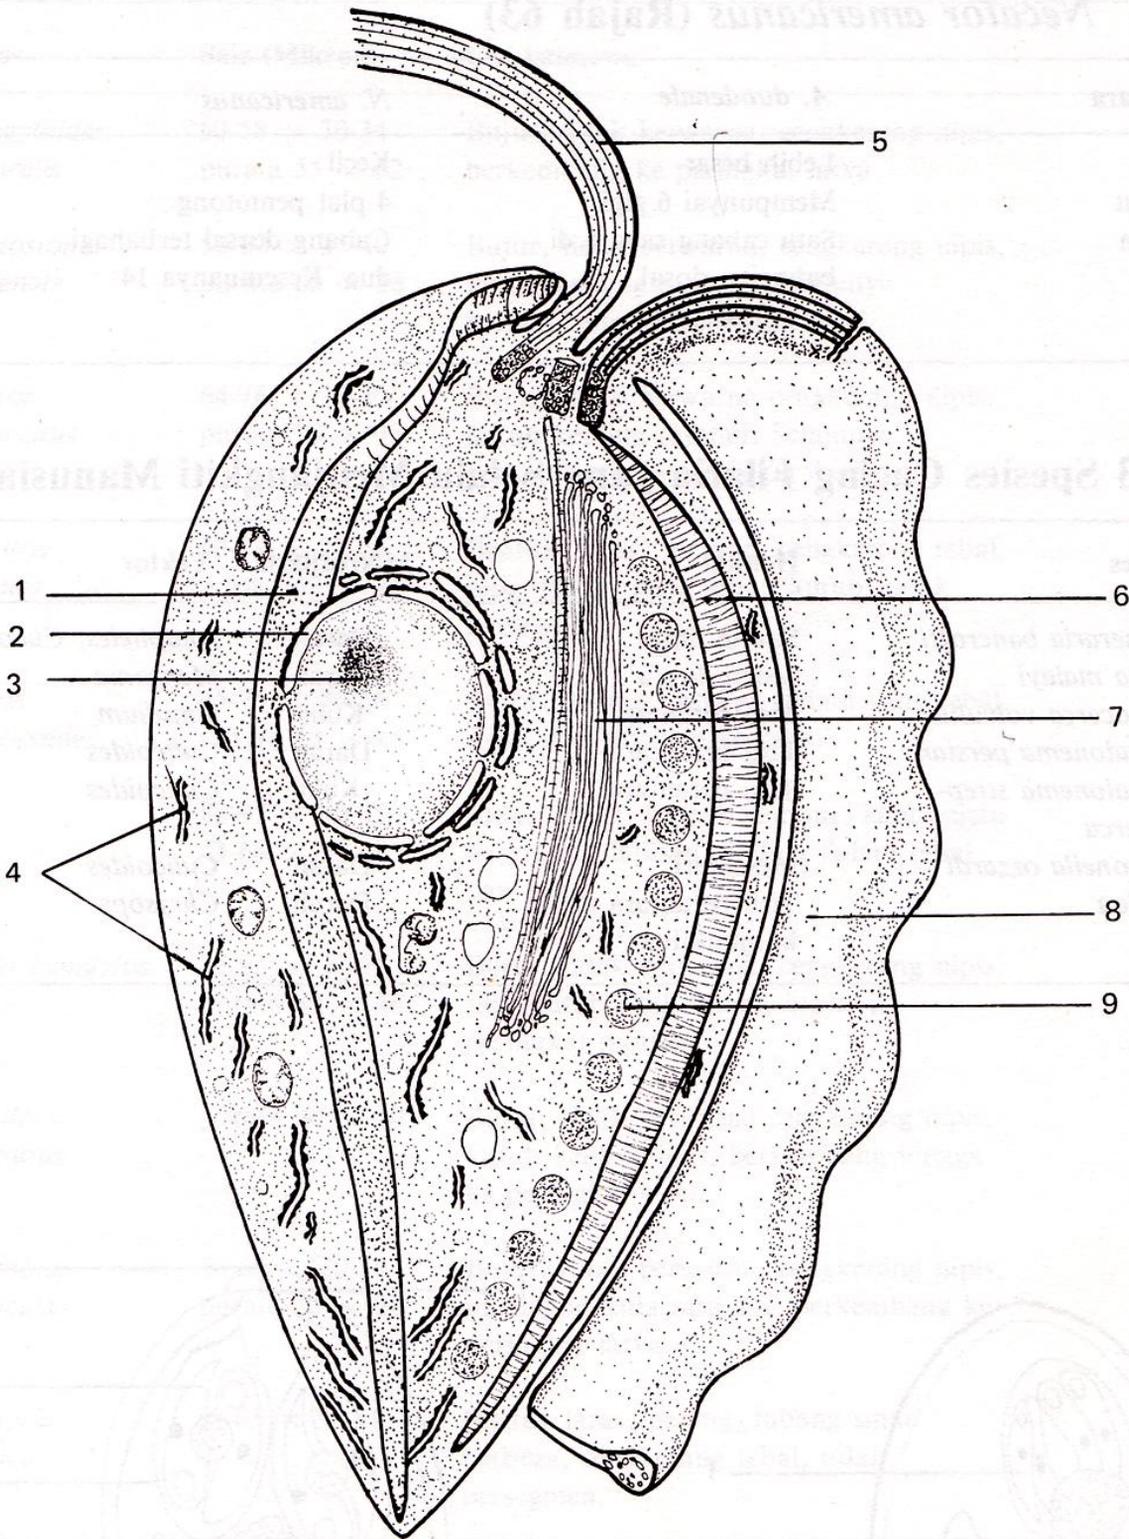

1. Telur keluar bersama najis. 2. Jangkitan melalui mulut.

**Rajah 52**

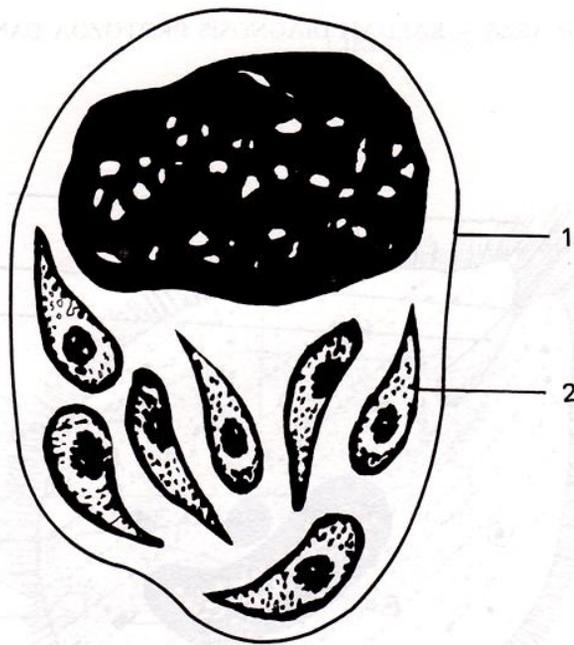

Morfologi 7 spesies mikrofilaria manusia.

- A. *O. vulvulus*. 1. Kepala: seperti sudu. 2. Ekor: nukleus tidak sampai ke hujung.  
 B. *D. streptocerca*. 3. Kepala: nukleus satu baris. 4. Ekor: bengkok - nukleus sampai ke hujung.  
 C. *M. ozzardi*. Ekor tajam tetapi nukleus tidak sampai ke hujung.  
 D. *D. perstans*. Ekor tumpul dan nukleus sampai ke hujung.  
 E. *W. bancrofti*. 5. Nukleus sampai ke kepala. 6. Ekor: nukleus tidak sampai ke hujung.  
 F. *B. malayi*. 7. Nukleus sampai ke kepala. 8. Mempunyai dua nukleus di hujung ekor.  
 G. *Loa loa*. Nukleus sampai ke hujung ekor.

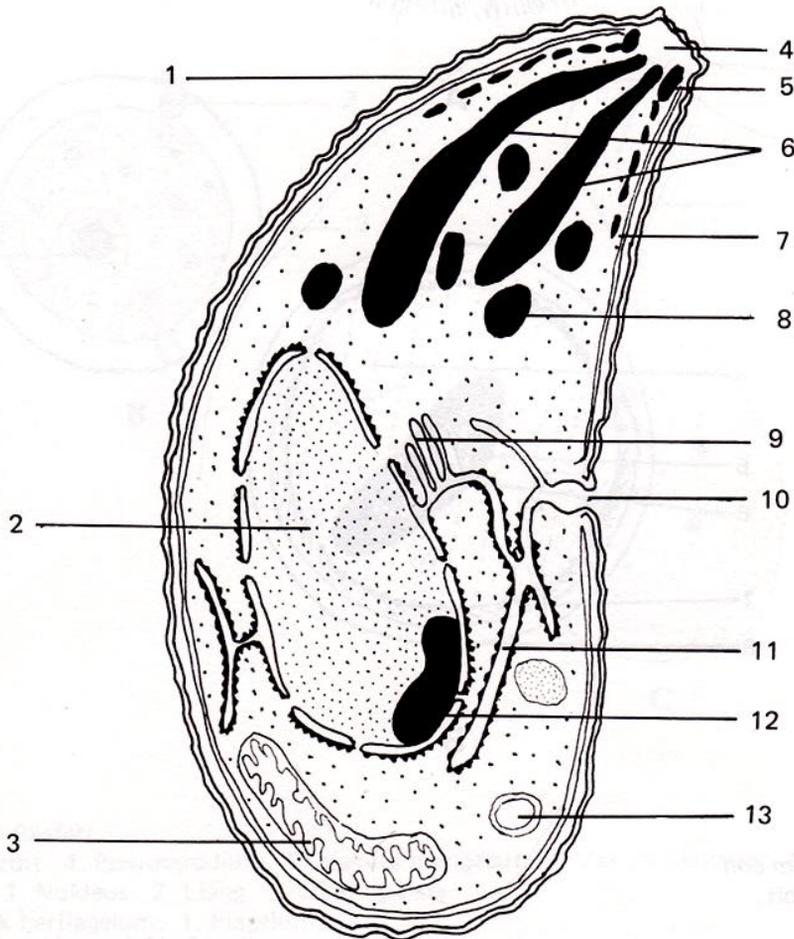

**Rajah 12**

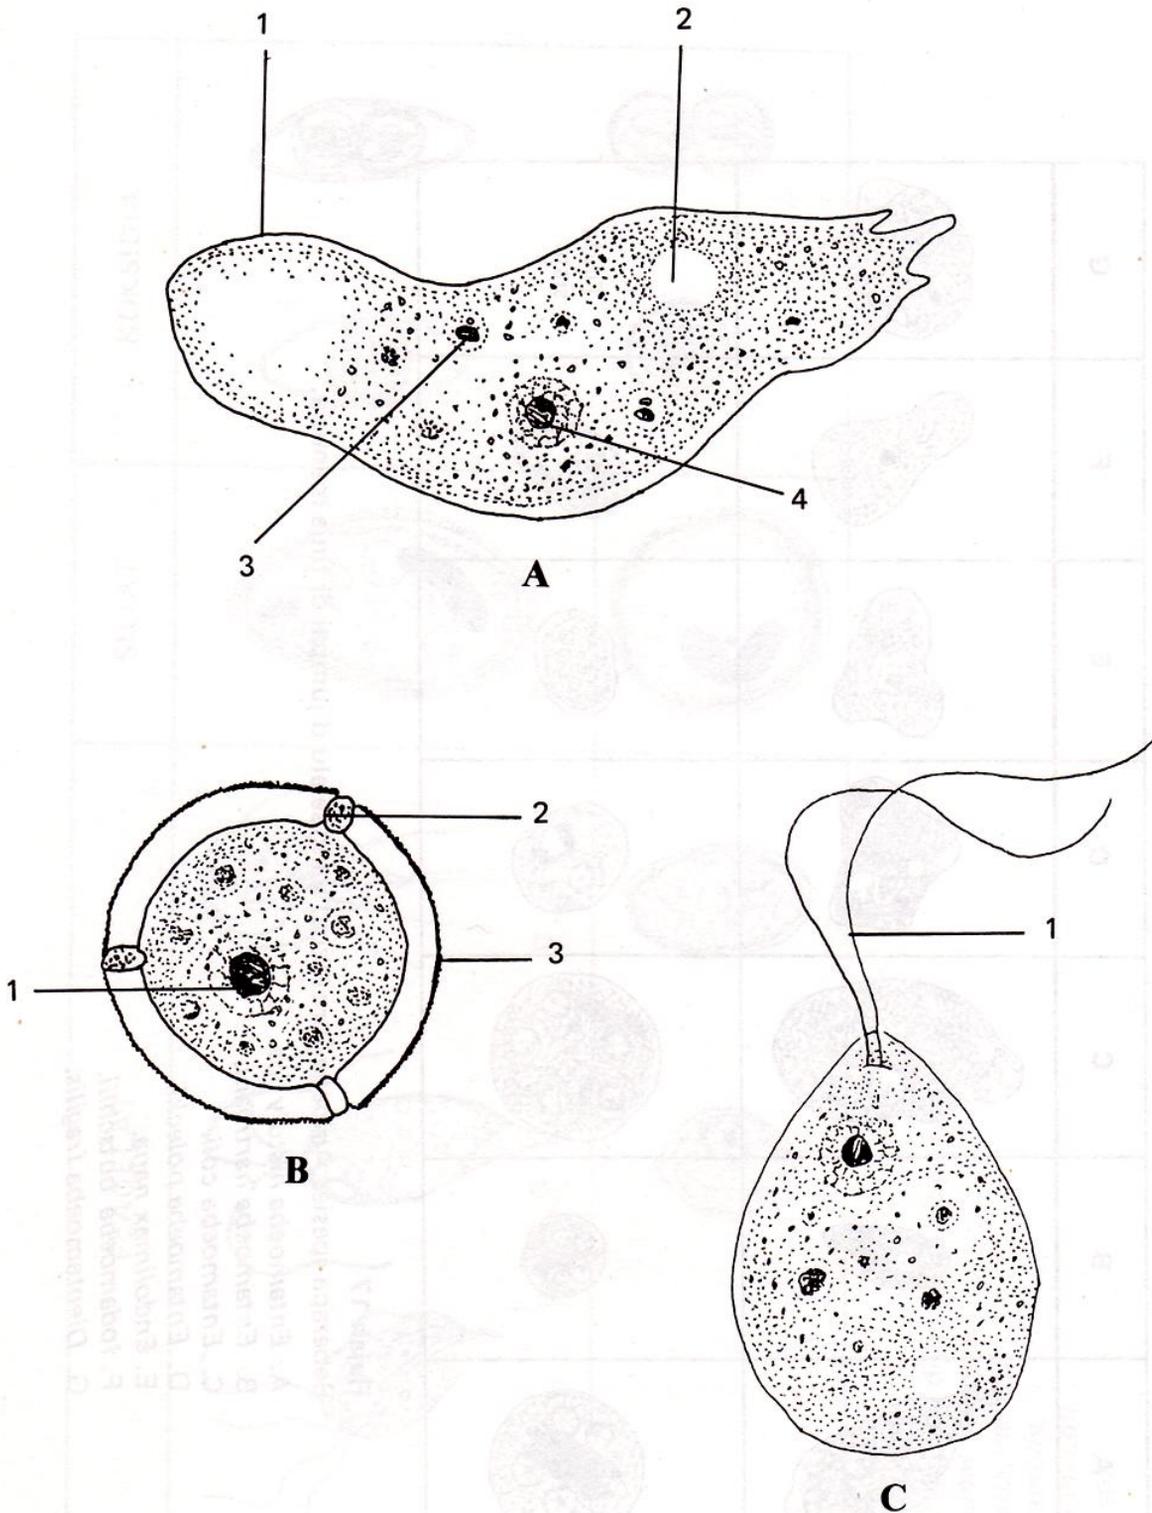

Struktur ultra *Trichomonas*. 1. Aksotil. 2. Membran nukleus. 3. Nukleus. 4. Retikulum endoplasma. 5. Flagelum anterior. 6. Kosta. 7. Jasad parabasal. 8. Membran bergelombang. 9. Jasad parakosta.

**Rajah 13**  
Trofozoit *Toxoplasma gondii* dalam makrofag. 1. Makrofag. 2. Toksoplasma.

**Rajah 14**  
Rajah skema struktur ultra *Toxoplasma gondii*. 1. Dinding sel. 2. Nukleus. 3. Mitokondrium. 4. Konoid. 5. Gentian pelikel. 6. Taksonem. 7. Membran sitoplasma. 8. Vakuol lipid. 9. Jasad Golgi. 10. Mikropil. 11. Retikulum endoplasma. 12. Nukleolus. 13. Vakuol.

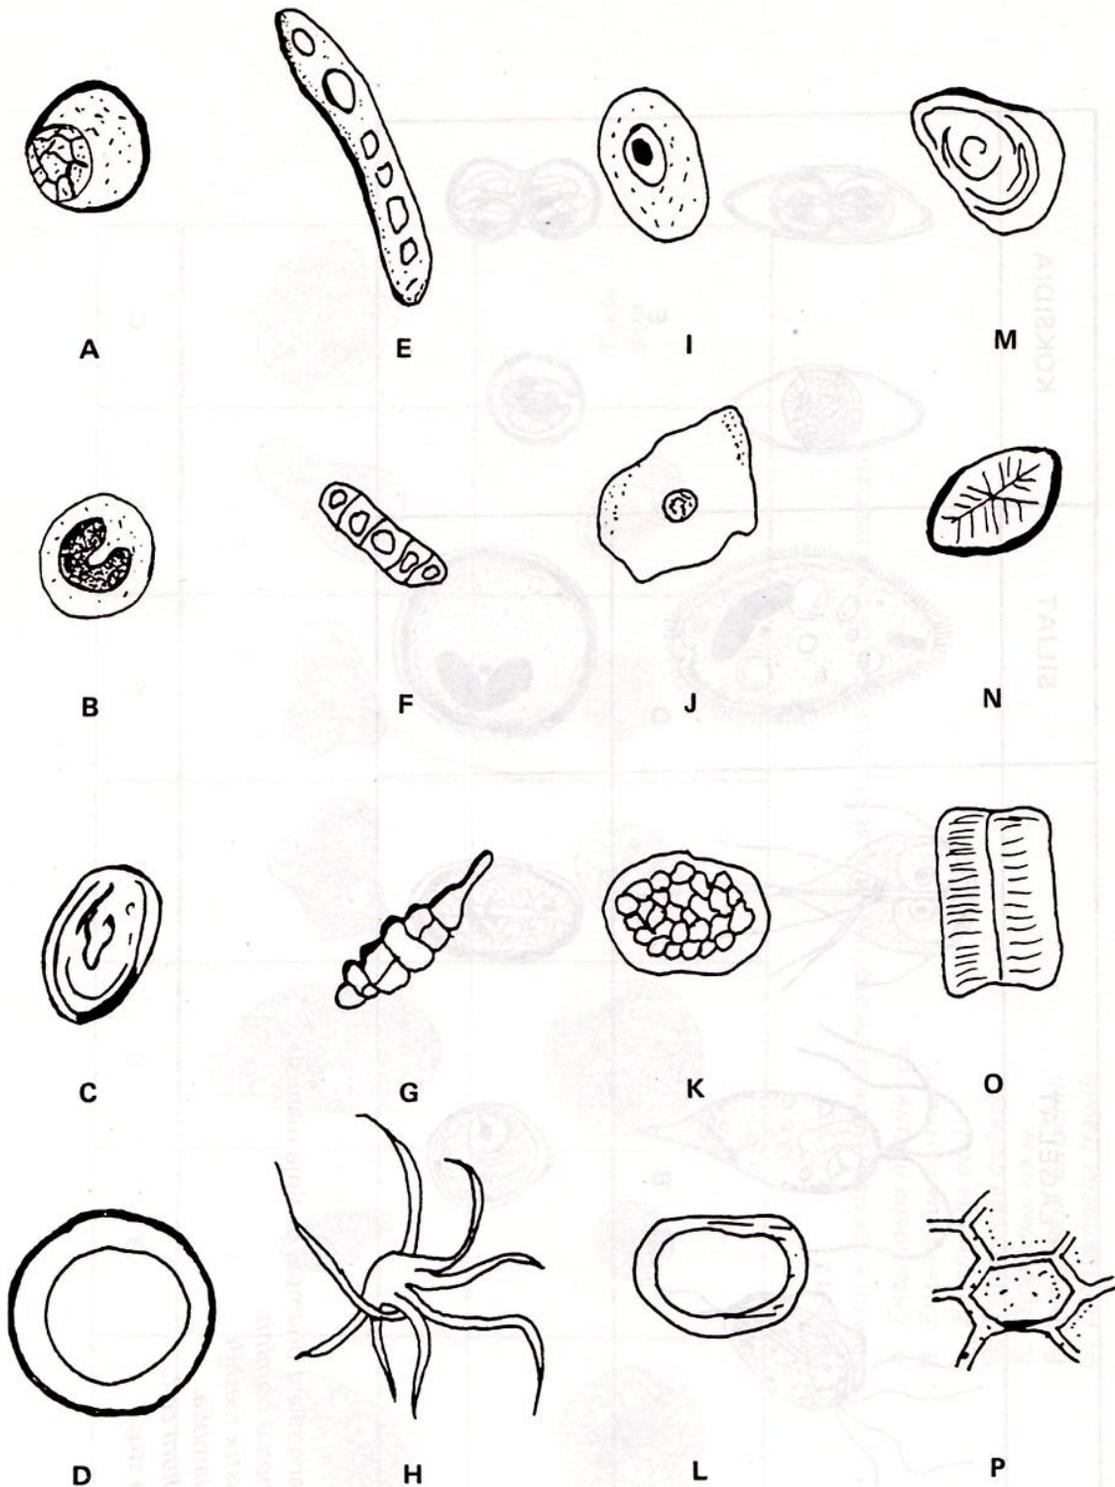

**Rajah 16**

*Naegleria fowleri*

A. Trofozoit. 1. Pseudopodium. 2. Vakuol mengecut. 3. Vakuol makanan. 4. Nukleus.

B. Sista. 1. Nukleus. 2. Liang 3. Dinding sista.

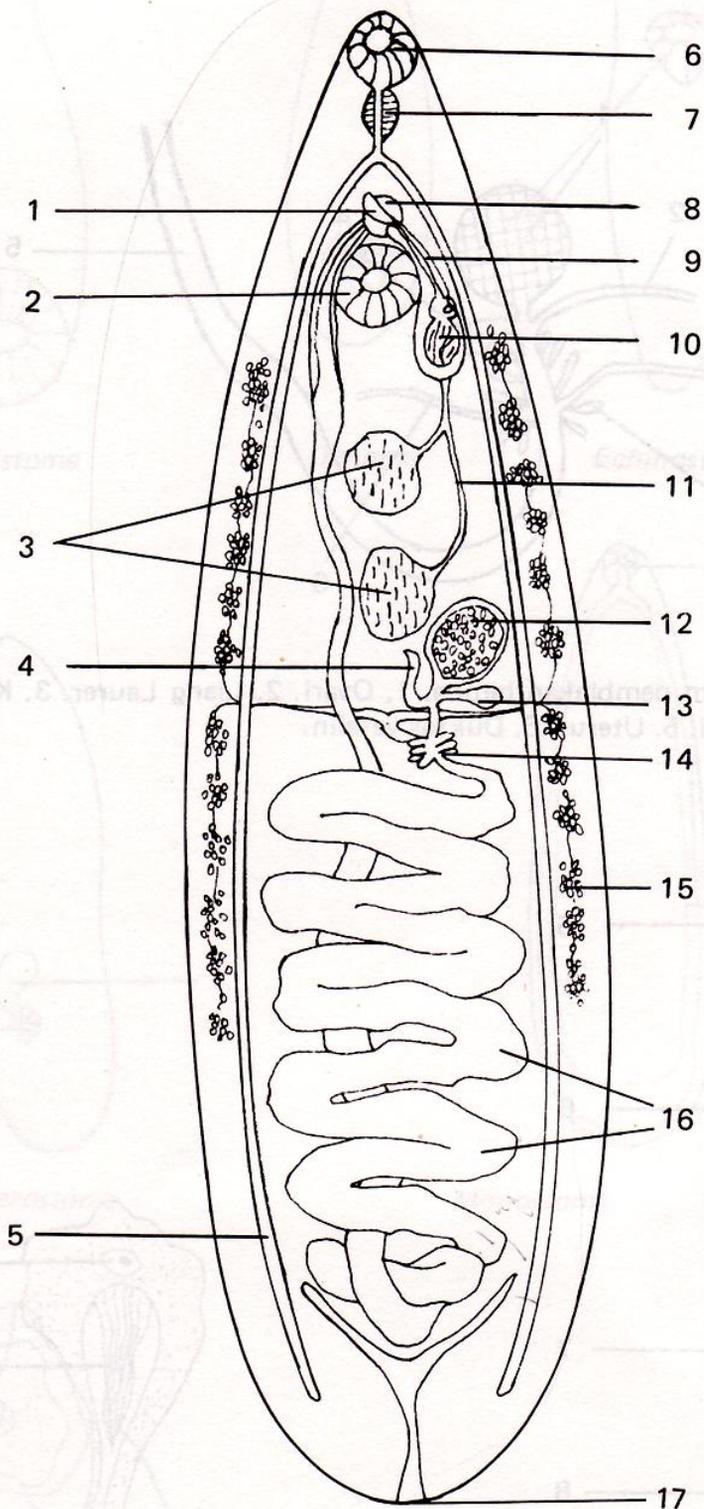

C. Bentuk berflagelum. 1. Flagelum.

**Rajah 19**

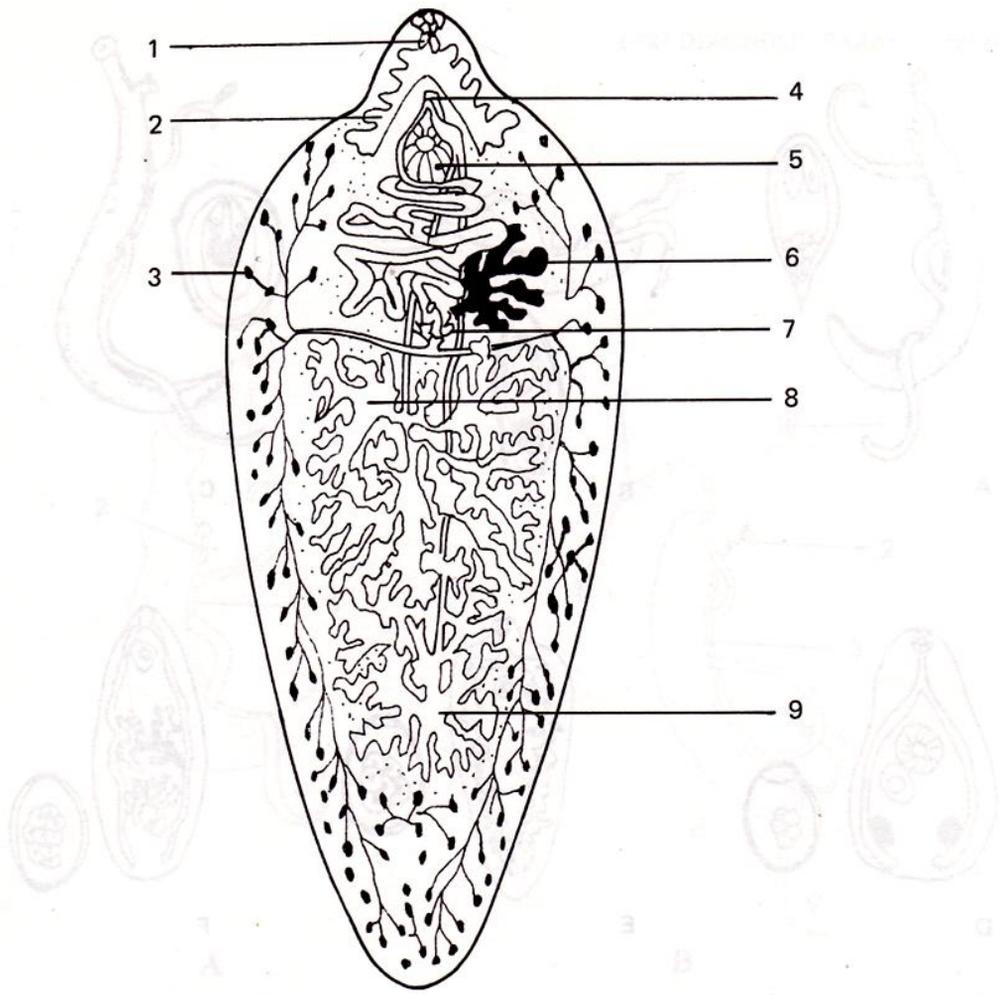

Objek-objek yang selalu dijumpai di tinja dan selalu tersalah cam sebagai telur atau sista parasit.

- |                     |                           |
|---------------------|---------------------------|
| A. Blastosistis.    | I. Sel epitelium.         |
| B. Leukosit.        | J. Sel skuamus epitelium. |
| C. Jasad selofen.   | K. Sel sayuran.           |
| D. Globul minyak.   | L. Sel sayuran.           |
| E. Helmintosporium. | M. Granul kanji.          |
| F. Akrotesium.      | N. Granul kanji.          |
| G. Alternaria.      | O. Gentian otot.          |
| H. Rambut tumbuhan. | P. Sel sayuran.           |

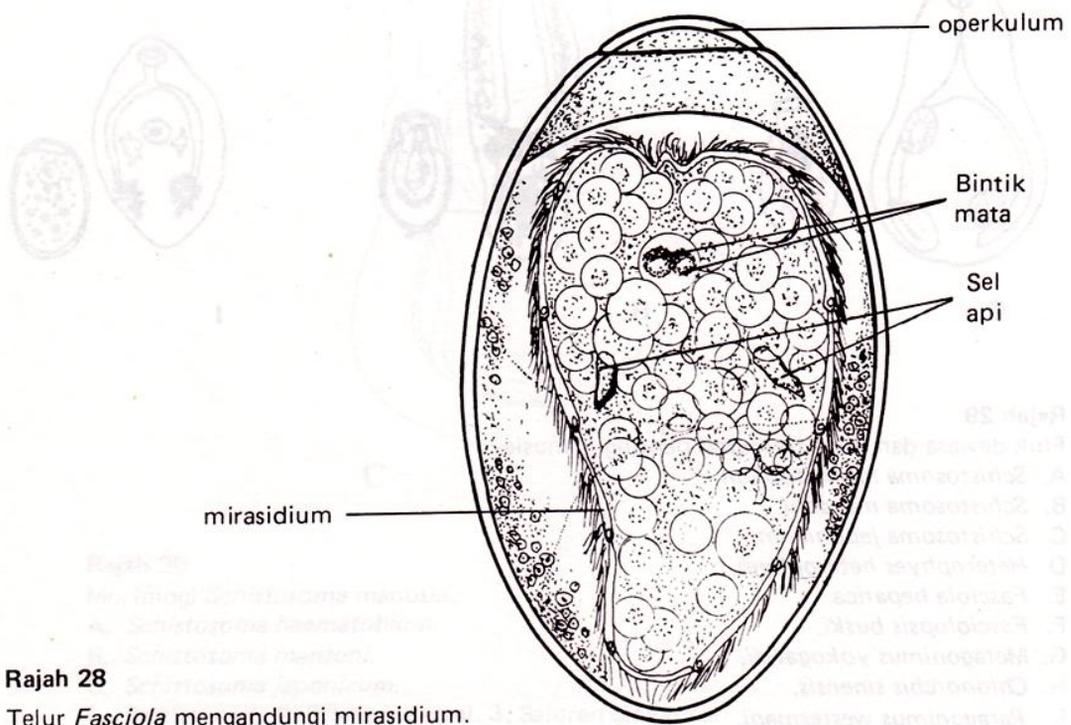

**Rajah 20**

Rajah skema trematod. 1. Sirus. 2. Pelekat ventral. 3. Testis. 4. Liang Laurer. 5. Usus. 6. Pelekat oral. 7. Farinks. 8. Genital atrium. 9. Pundi sirus. 10. Vesikel seminal. 11. Vas eferens. 12. Ovari. 13. Reseptakel seminal. 14. Kelenjar Mehlis. 15. Vitellaria. 16. Uterus.

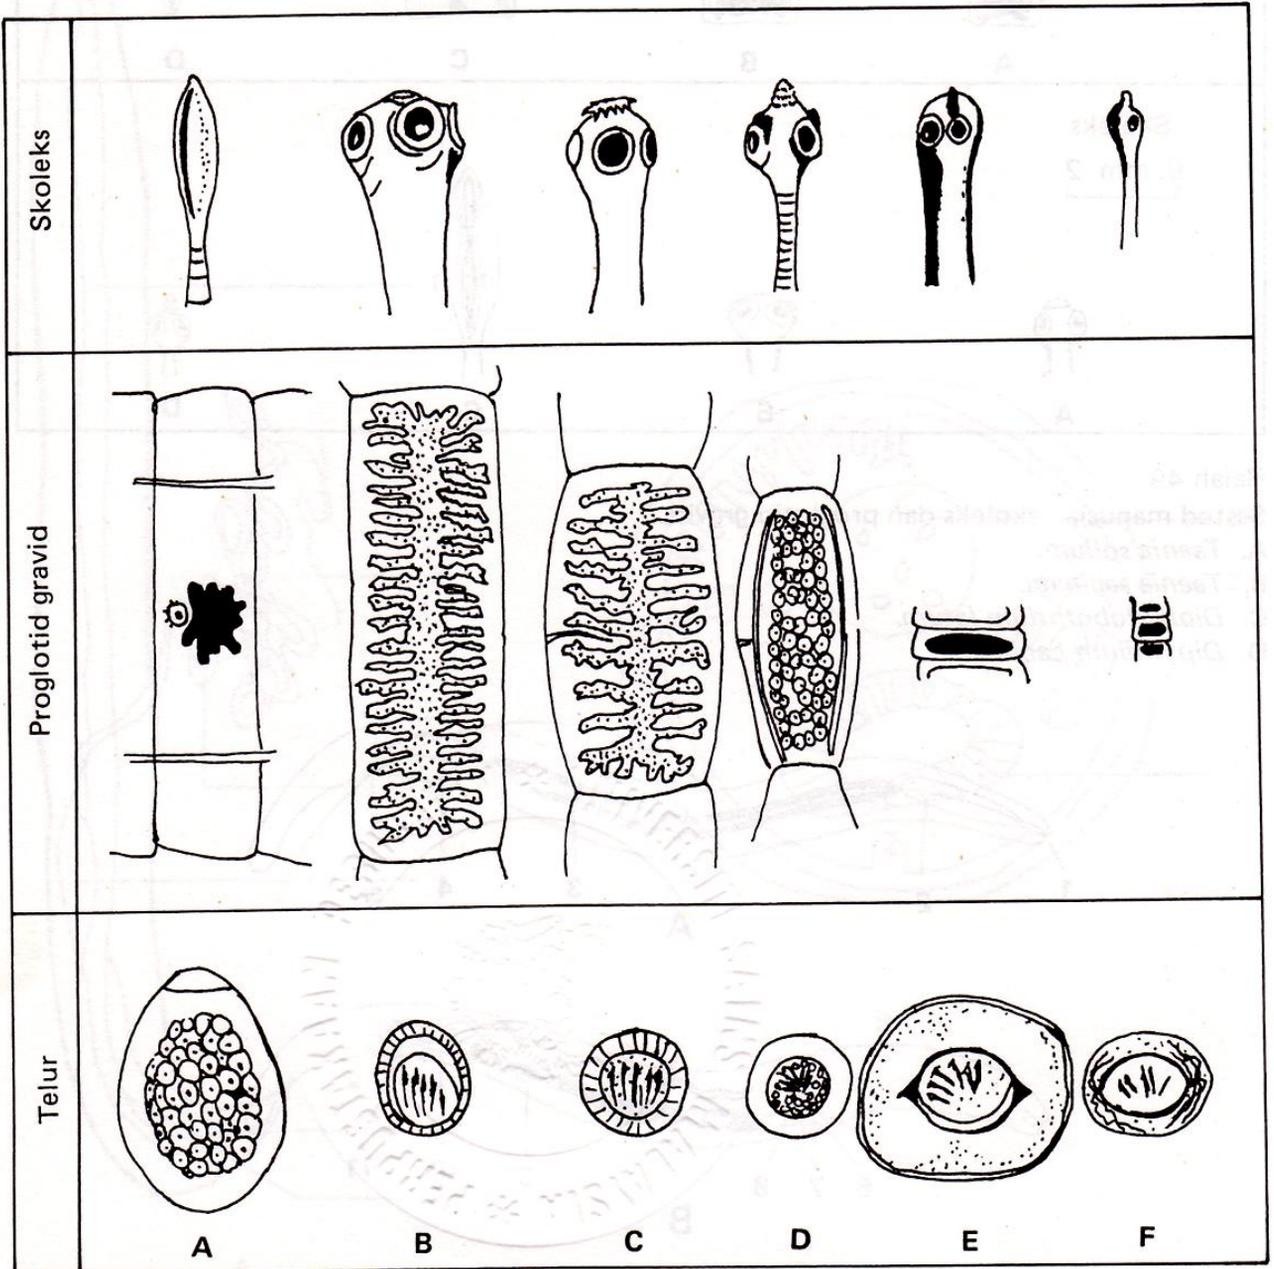

**Rajah 27**

*Fasciola gigantica* : Dewasa. 1. Farinks. 2. Usus. 3. Vitellaria. 4. Genital atrium 5. Pelekat ventral. 6. Ovari. 7. Ootaip. 8. Testis 1. 9. Testis 2.

**Rajah 28**

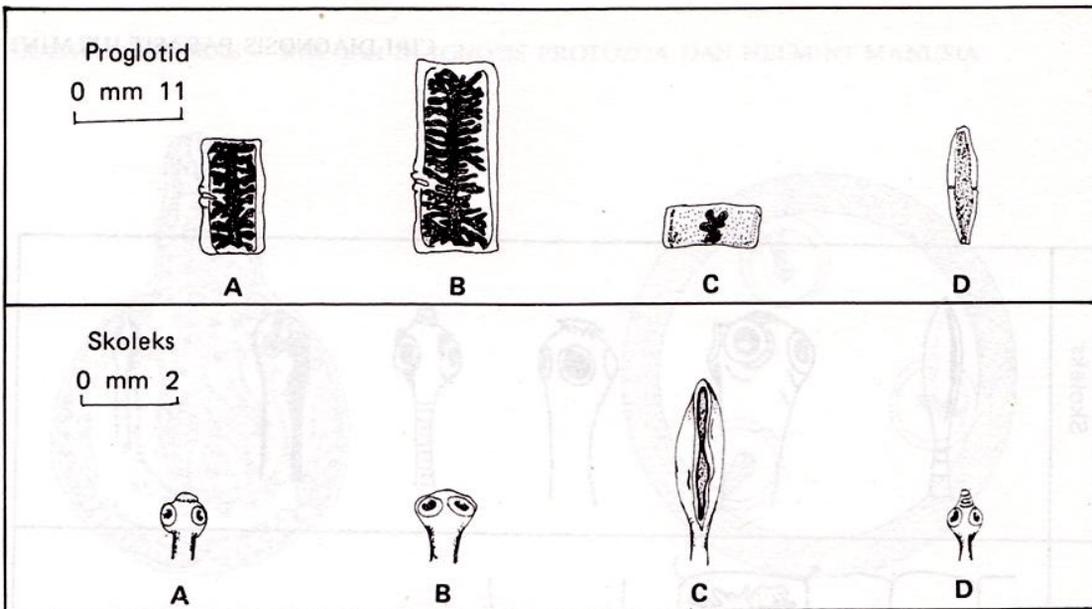

Telur *Fasciola* mengandungi mirasidium.

**Rajah 48**

Ciri-ciri pembeza cacing pita manusia.

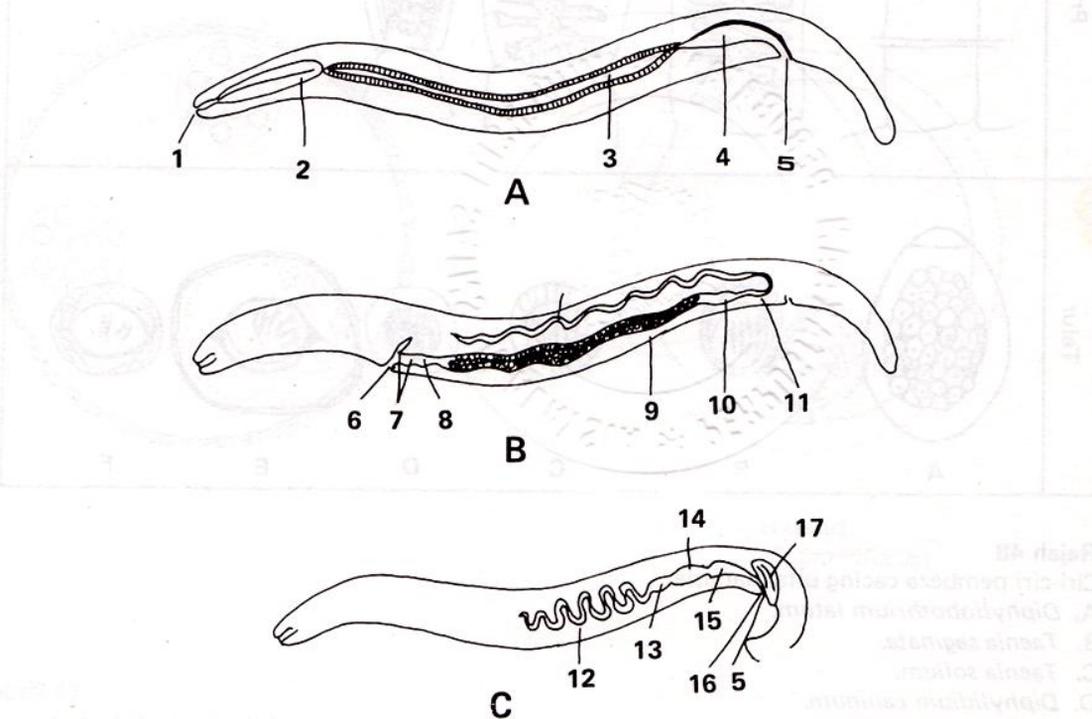

- A. *Diphyllobothrium latum*.
- B. *Taenia saginata*.
- C. *Taenia solium*.
- D. *Diphylidium caninum*.
- E. *Hymenolepis diminuta*.
- F. *Hymenolepis nana*.

Rajah 49

Sestod manusia - scoleks dan proglotid gravid.

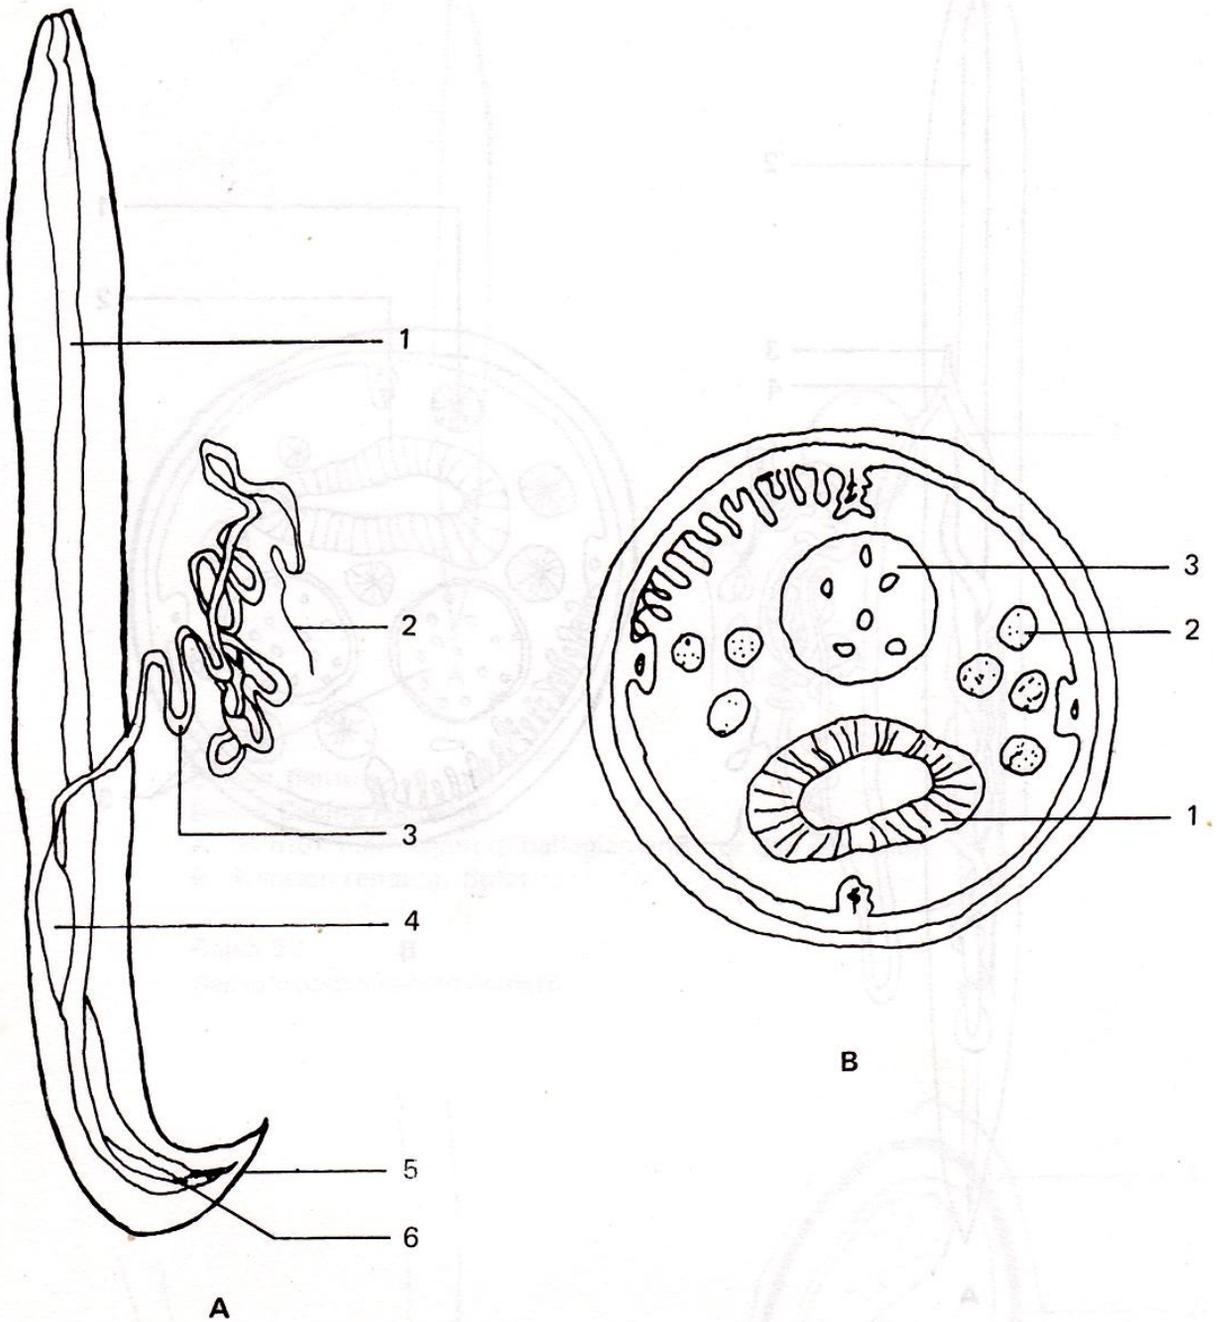

- A. *Taenia solium*.
- B. *Taenia saginata*.
- C. *Diphyllobothrium latum*.
- D. *Dipylidium caninum*.

Rajah 50

Morfologi cacing nematoda.

- A. Sistem pencernaan.
  - B. Sistem pembiakan ♀.
  - C. Sistem pembiakan ♂.
1. Mulut. 2. Esofagus. 3. Usus. 4. Rektum. 5. Anus. 6. Valva. 7. Vagina. 8. Ovipositor. 9. Uterus. 10. Reseptakel semen. 11. Oviduktus. 12. Testis. 13. Vas deferens. 14. Vasikal semen. 15. Duktus pemancutan. 16. Kloaka. 17. Spikula.

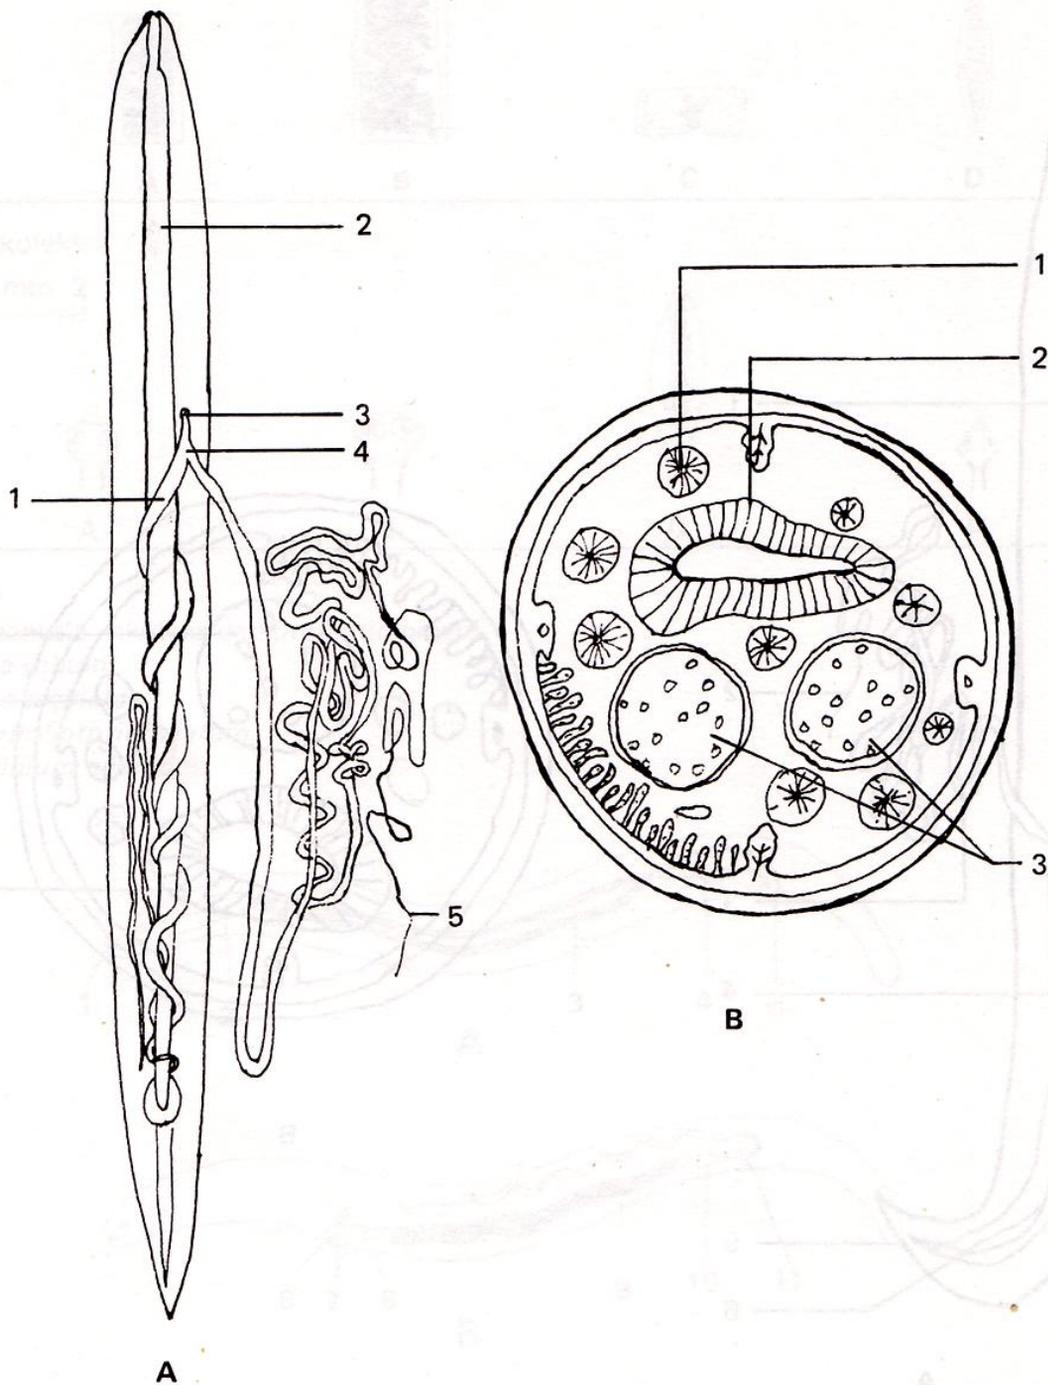

**Rajah 51**

Nematoda: Sistem pembiakan cacing jantan.

A. Pembedahan; mendedahkan testis dan duktus-duktus yang berkaitan dengannya.

1. Usus. 2. Testis. 3. Vas deferens. 4. Vesikel seminal. 5. Spikula. 6. Kloaka.

B. Keratan lintang. 1. Usus. 2. Testis. 3. Vesikel seminal.

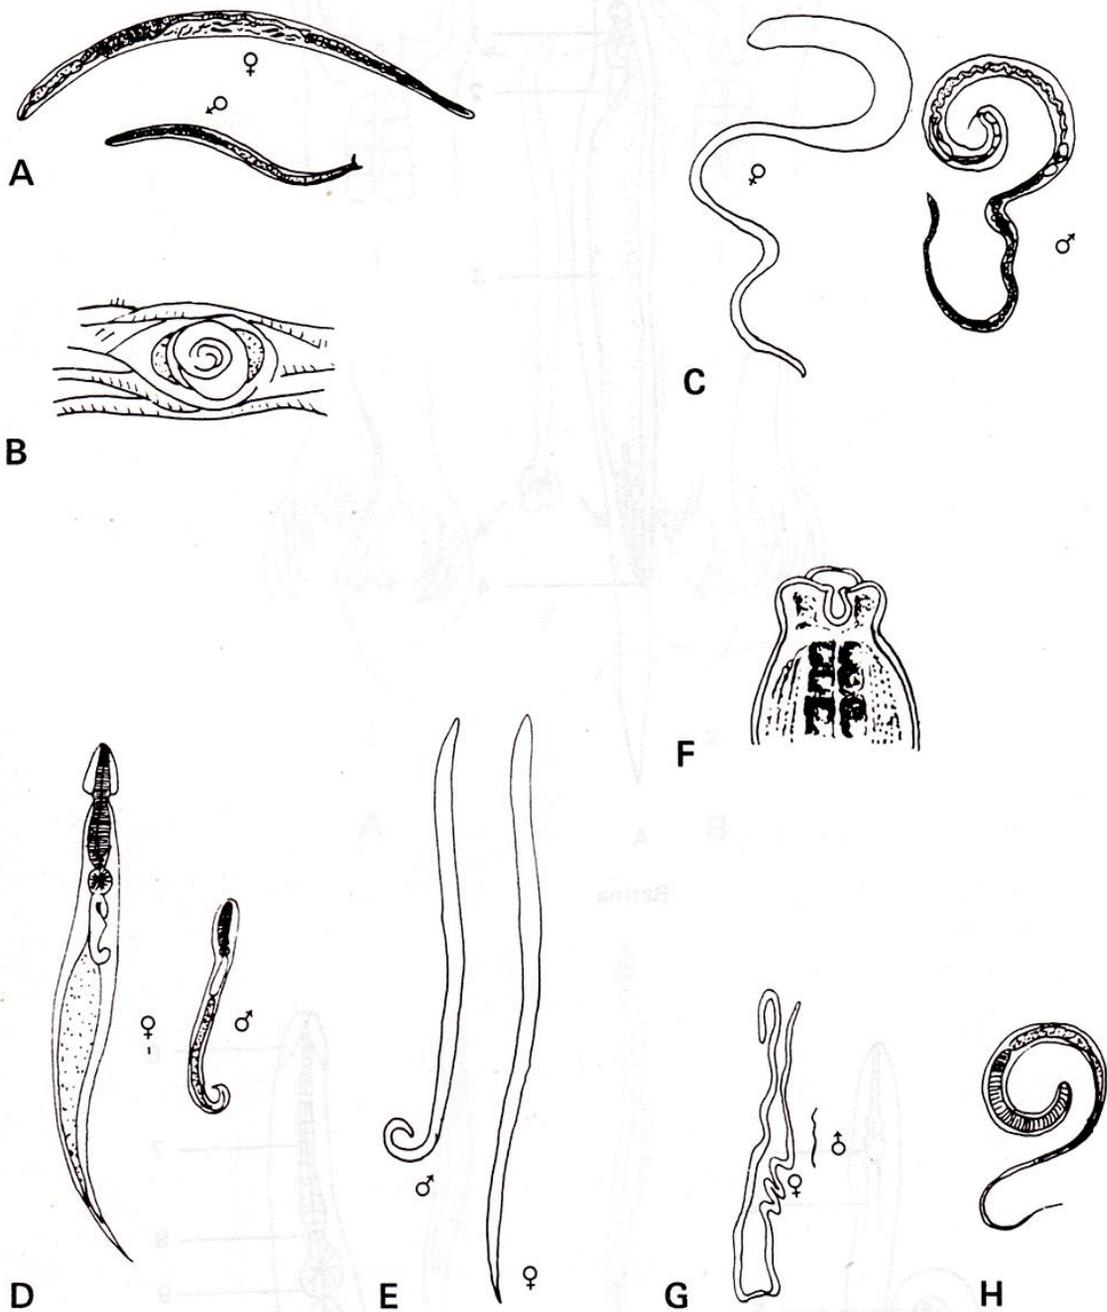

**Rajah 52**

Nematoda: Sistem pembiakan cacing betina.

A. Pembedahan menunjukkan ovari dan uterus. 1. Uterus. 2. Usus. 3. Vulva. 4. Vagina  
5. Ovari.

B. Keratan Lintang. 1. Ovari. 2. Usus. 3. Uterus.

**Rajah 57**

Morfologi dan anatomi beberapa cacing nematod penting manusia.

A. *Trichinella spiralis*.

B. *T. spiralis* di otot lidah.

C. *Trichuris trichura*.

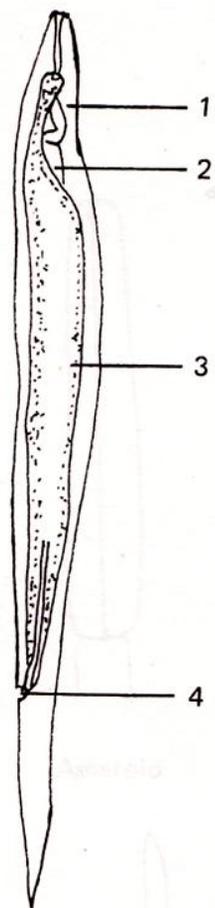

D. *Enterobius vermicularis*.

E. *Ascaris lumbricoides*.

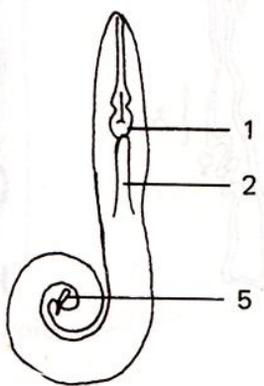

F. *A. lumbricoides*, bahagian kepala menunjukkan tiga bibir.

G. *Pracunulus medinensis*, betina.

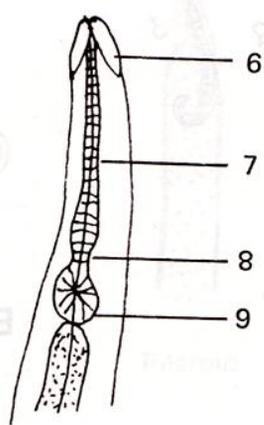

H. *D. medinensis*, larva

A  
Betina

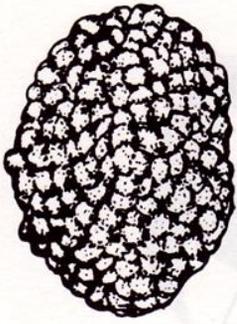

B  
Jantan

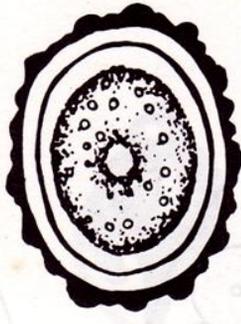

C  
Bentuk Esofagus

**Rajah 58**

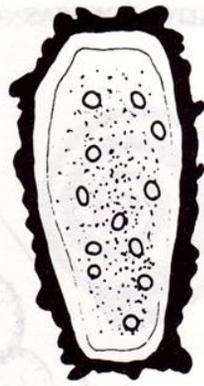

*Enterobius vermicularis*. 1. Bonjol esofagus. 2. Usus. 3. Uterus. 4. Anus. 5. Spikul. 6. Serviks alea. 7. Esofagus. 8. Genting. 9. Bonjol.

### Rajah 68

Telur cacing helmin yang dijumpai di tinja manusia.

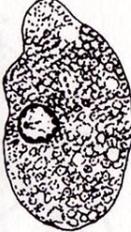

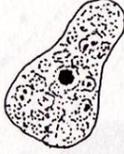

- |   |                                  |
|---|----------------------------------|
| 1 & 2. Telur <i>A. lumbricoides</i> (telah disenyawakan). | 10. Telur <i>S. mansoni</i> .    |
| 3. Telur <i>A. lumbricoides</i> (tanpa senyawa).          | 11. Telur <i>S. japonicum</i> .  |
| 4. Telur <i>N. americanus</i> atau <i>A. duodenale</i> .  | 12. Telur <i>F. buski</i> .      |
| 5. Telur <i>E. vermicularis</i> .                         | 13. Telur <i>G. hominis</i> .    |
| 6. Telur <i>T. trichura</i> .                             | 14. Telur <i>D. latum</i> .      |
| 7. Telur <i>T. solium</i> atau <i>T. saginata</i> .       | 15. Telur <i>C. sinensis</i> .   |
| 8. Telur <i>H. nana</i> .                                 | 16. Telur <i>P. westermani</i> . |
| 9. Telur <i>S. haematobium</i> .                          |                                  |

**Rajah 69**

Siput-siput yang menjadi perumah perantara fluk manusia.

- A. *Bulinus contortus*.
- B. *Physopsis africana*.
- C. *Biomphalaria bioisnyi*.
- D. *Oncomelania hupensis*.
- E. *Oncomelania nosophora*.
- F. *Parafossarulus manchouricus*.
- G. *Bulimus fuchsiana*.
- H. *Lymnaea truncata*.
- I. *Hippeutis schmackeri*.
- J. *Gyraulus prashadi*.
- K. *Thiara libertina*.
