For me, your way of delivering the lectures in class make me easier to understand the whole concept of this subject. Instead of just using the scientific terminology, more layman terms are used to explain the content of lectures. I enjoyed your class as I can easily understand your explanations regarding the lecture's content. Thank you, Prof.

Saya suka cara Prof yang tidak membebankan pelajar terutamanya untuk test. Ini sangatlah membantu kami mendapatkan carry marks terbaik dan kami juga dapat mengetahui cara menjawab dengan adanya sesi perbincangan jawapan test. Sesi mengajar juga sangat berkesan dengan banyak contoh yang Prof bagi yang juga diselitkan dengan cerita-cerita fakta ataupun dari pengalaman. Pengajaran dan pembelajaran sebegitu sangat berkesan kepada saya. Terima kasih Prof

For me, I really love your style of teaching which you attract us to become more interested in learning this subject. You also made the 2 hours learning period become less intense and relax even though the subject is kind of new to us. Also, I like it how you keep on coming to class on time and sometimes, you even able to show up before the class starts. By doing that, we, as students become more eager to come early to class as we believe that we can be as punctual as you too! Last but not least, thank you for teaching me this subject and also for sharing too many valuable lessons for me to follow in order to become a great person later on. Wishing you a healthy, healthful and joyful life ahead Prof!
