I love the way you are teaching. Actually, the first time i read your lecture note i found it difficult to understand because most of the word that you used is ' bombastic word ':D . So, i took initiative by focus on your explanation during your lecture. Then I can easily understand because you used both English and Malay during the explanation. To me, your lecture note can help me to improve in English and increase my vocabulary as I learn many new words in your lecture note. Thank you Prof. for teaching me.

the content of this subject are pretty boring, but you manage to make it interesting. i love the way you explain and relate what we learn with our daily life. the most important thing that we learn from your lecture is the attitude as a pharmacist and the way we see the career as a pharmacist.

I love the way you deliver your lecture by giving us examples and situation that we need to avoid when we apply a professional career. Prof also always make some jokes and speaks Terengganu dialect which I found funny and prevent me from feel sleepy and boring during your lecture. I would like to thank you for your effort to teach us for this semester :)

I love the way you teach. You go through every single slides by highlighting the points yet I was never bored in your class. Everytime my mind flew off, you manage to bring me back by your light hearted jokes and memories of your experience. These keep me on toes as I tend to focus more in your class and actually having fun while learning. Thank you Doc Lua.

In my opinion, i really love the way you deliver your teach plus this lecture is quite boring and students will lose their attention. Besides, i can understand this lecture because you don't use fully english in your teaching instead use "bahasa terengganu" that make become me more understand during your lecture. :)

The thing I like the most about this class is the manner of your teaching. Your lessons are always very wholesome as the knowledge you provide us with is always beyond the slides and is not just restricted to the syllabus of this subject. Sitting in your class is never tiresome and it's always a joy to hear about your experience as a pharmacist. It makes me look forward to becoming a pharmacist one day too. On top of that, despite this subject being quite heavy, you make it seem so easy to understand and the time just flies by. Entering your class never feels like a chore.

Thanks for a wonderful semester Prof.:~)

I find that the way you are teaching is fun. The way you explain about the topics is easier for me to understand as you use both English and Malay. As Fundamental of pharmacy Practice is a new thing that I need to learn and this subject is more towards reading and understanding, it tooks quite a time for me to understand about the words that you used in the lecture note. I also like the way you insert the "tazkirah" part during your lecture and your experiences as pharmacist. What I like most is your lecture notes. They are so colourful and very nice. It is so easy to see the important words that were highlighted and helps me to memorize the notes. Looking foward for your next lecture prof! :-)

For me, I love your way of teaching. I can't help but laugh everytime during your lectures due to your jokes and 'deep' tazkirah. To be honest, it helps me a lot from falling asleep during class. As this subject leaning more towards reading and understanding, it requires quite a time to digest some of the sentences in the lecture note. However, with you simplifying each of the sentences during lectures, it aid me to understand them better.

Also thank you prof for finishing the class earlier. Sometimes there are students who manage to pray only but didn't have enough time to eat lunch for they have to wait for their turn to pray when the prayer room is packed with other students. So, by letting us went for rest earlier, it ease us so much since we get enough time to do both; pray and have lunch.

Lastly, i'm looking forward to have you as our lecturer once again in the future. (Well.... Perhaps not once. Actually the more, the better. :-D)

In my opinion, your teaching style is very interesting and not so bored that can draw students attention during 2 hours lecture. The explanation given are easy for students to understand and prof also focus to the important point that we need to be emphasized and can be used during revision. You are not only teach us about pharmacy practise but also about the reality/quality of life :) thank you prof.

This course is a new course for us and it is quite difficult for me to understand the lecture at first, but thanks to your funny stories and real life experiences, they did gained my attention during class thus help me to not fall asleep or get bored during your lecturer.

The lecture notes are given early so I can read it first, however, my English is not as good as yours, can't even compare, so I do have problem understanding the lecture notes a bit, but thanks to google translate, i manage to grab the idea of what the lectures are about.

Thank you for being such a great lecturer and teach me not just this course, but also life in general.

1. Prof Lua is so funny and that makes me hard to feel bored sleepy in the class.
2. Prof Lua is very energetic and straight to the forward when giving the lecture.
3. For me, the lecture is quite hard because they are not science subject that we can think and relate to. To study this subject i need to think logically. But i believe this subject is really really important for us to become a better pharmacist for the social in the future.
4. Most of Prof Lua lecture also help me to have a better understanding on how to speak confidently in front of people.

My comment on the course and your teaching :

- 1) the course is very dry to understand and to memorize. however, i will try my best to get the best score in this course.
- 2) i like that Prof. always have some stories to tell us between the lecture because it always make me feel less sleepy.
- 3) Prof. is very easy to negotiate and very understanding. you are also very funny , Prof.
- 4) i like the way Prof. try to give the lecture as simple as it can.
- 5) i like that Prof. always end the lecture earlier so that the student can have longer break because we have a very packed schedule on Wednesday.

Thank you Prof. for always giving the best for us :).

As a first year student, Fundamental of Pharmacy is a totally foreign subject to all of us. But, I am glad that we got you as our lecturer because u make everything looks 10x easier and explain every lecture very well(by giving situations etc). Thank you prof for all the knowledge that u have shared with us in this whole semester:)
