I like your style of teaching and I think the way you teach your students is very different from other lecturers that I have met since I was in my diploma years. The way you teaches your students are very different because you not only delivered the content of the lecture notes but you also teach and tell us about life and have set a great example for all of us to follow, you have inspired us to be better people and to always strive to do our best. The best lessons are not learned from a book but from the hearts of truly great teachers like you. Thank you.

I love your teaching style, the way you communicate with us and how you relate what you teach with stories and current issues. The way you prepare your lecture notes also great and make it easier for me to read and find information (i love that you use big font and highlighted the keyword). You are the first lecturer that make me feels that learning can be so interesting and fun. Thank you for everything prof 😊

I love how you present your lectures to us. The way you do it I can really sense that all of it comes from your truly heart. You want to help the students and give as much as possible the contents that come from your knowledge and experiences. I'm also amazed how systematic your slides are that helps me to understand it. Not only that, while giving lecture you also added with some values of life that helps me to open my mind a little bit that the world does not revolve around me alone and I need to stand alone with my own two feet because nobody will help me except myself. Thank you prof for giving your best in teaching us and I will give my best also to remember all the notes and for the final examination. Thank you again prof.

by [NUR SHAFIKAH SUHADA BINTI ABDUL RAHMAN](#) - Monday, 9 December 2019, 5:45 PM

Besides the information about the subject itself, the lecture also was filled with lots of information about general knowledge and life experiences that we can relate, learn and as an eye opener for us to explore the outside world, about our society and our culture. The lecture was fun and the examples given was easier to be understand rather than learn 100% according to the slide.

Overall, I really glad I get a chance to learn under Prof. She really know which point that need to focus and which is not. She know how to summarized heavy subject into simple form which can be easy to understand by students. She always include example of situation to make us more understanding on about some theory. She also ease us given direct questions in test. Health and Behavior is not an easy subject, and I really glade she can light up the situation with telling story that actually have it own meaning. I really satisfy with her teaching method.

Hi Prof.

To be honest, your lecture is so interesting for me to learn because the slide is colorful, simple and the example is interesting. You also teach us by giving a reality example for us to learn especially about what happened to our surroundings. However, the subject is a bit difficult for me to memorize for the exam because the subject is new and full of facts and if I don't remember I can't answer using my own words. Thank you, Prof. for teaching us.
